SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL ECONOMIC OVERVIEW

Global growth is forecast to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024. For advanced economies, the expected slowdown is from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024, amid stronger-than-expected US momentum but weaker-than-expected growth in the euro area. Emerging market and developing economies are projected to have growth modestly decline, from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024, with a downward revision of 0.1 percentage point in 2024, reflecting the property sector crisis in China. Forecasts for global growth over the medium term, at 3.1 percent, are at their lowest in decades, and prospects for countries to catch up to higher living standards are weak. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024. But the forecasts for 2023 and 2024 are revised up by 0.1 percentage point and 0.6 percentage point, respectively, and inflation is not expected to return to target until 2025 in most cases.

Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of prepandemic projections, especially in emerging markets and developing economies. The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about

4.2 percent, compared with prepandemic predictions. Other emerging markets and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent.

INDIAN ECONOMY OVERVIEW

According to the report by the World Bank, India was one of the fastest growing major economies in FY 2022-23 at 7.2%. India's growth rate was the second highest among G20 countries and almost twice the average for emerging market economies. This resilience was underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector.

Robust economic expansion during the initial quarter of the fiscal year 2023 enabled India to surpass the United Kingdom, securing its position as the fifth-largest global economy, having successfully rebounded from the adverse effects of the COVID-19 pandemic. According to the World Bank's Industrial Development Update, it is expected that the global headwinds will continue to persist and intensify due to high global interest rates, geopolitical tensions, and sluggish global demand. In this context, the World Bank forecasts India's GDP growth for FY 2023-24 to be 6.3%.

INDIA INFRASTRUCTURE SECTOR

India's trajectory towards robust growth in 2023 and beyond hinges significantly on substantial advancements in crucial sectors, with a pivotal role played by the development of infrastructure. Infrastructure serves as a key facilitator in propelling India toward achieving a formidable US \$26 trillion economy. The Indian economy's main growth engine is the infrastructure sector. The Government of India (GoI) gives highest priority on its development to guarantee the country's overall development. Investments directed towards constructing and enhancing physical infrastructure, particularly in harmony with initiatives promoting the ease of conducting business, stand as a critical factor for boosting efficiency and cost-effectiveness. Prime Minister Narendra Modi has recently underscored the indispensable nature of infrastructure as a pillar for ensuring effective governance across sectors.

The government's unwavering commitment to shaping the future of infrastructure is evidenced by a series of recent initiatives. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, is at the forefront of ushering in systematic and effective reforms in the sector, having already made significant strides. Initiatives like the "Smart Cities Mission" and "Housing for All" have been beneficiaries of these infrastructure-focused endeavors. Saudi Arabia, in turn, aims to allocate substantial investments of up to US\$ 100 billion in India across sectors such as energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

ROAD AND HIGHWAYS INFRASTRUCTURE

The forecast for the roads and highways market in India indicates a remarkable Compound Annual Growth Rate (CAGR) of 36.16% from 2016 to 2025. This projection is attributed to the government's increasing initiatives to enhance the transportation infrastructure across the country.

Innovations and exceptional performance characterize India's highways sector. The government has successfully introduced over 60 road projects, surpassing a value of \$10 billion, employing the Hybrid Annuity Model (HAM). The HAM approach has effectively balanced risk distribution between private and public partners, fostering increased Public-Private Partnership (PPP) engagement in the sector.

The National Highways Authority of India (NHAI) has adopted asset recycling through the toll-operate-transfer (ToT) model for 100 highways. Notably, the first two bundles, each comprising nine highways, were successfully monetized, attracting investments exceeding \$2 billion.

SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision prospective investor must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 114, “Industry Overview” beginning on page 100 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 261 respectively, as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;*
- Some events may have material impact qualitatively instead of quantitatively;*
- Some events may not be material at present but may have material impact in future.*

The financial and other related implications of the risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian Accounting Standards, as restated in this Draft Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 2. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

- 1. Our entire revenue stream is derived from activities within the state of Tamil Nadu. Any unfavorable developments that may impact our operations in this region could have negative consequences on our business, financial health, and operational results.***

The entirety of our revenue is sourced from the State of Tamil Nadu. The concentrated geographical focus of our business in this region increases our vulnerability to unfavorable developments such as heightened competition, economic shifts, and demographic changes. These factors could potentially have adverse effects on our business prospects, financial well-being, and operational outcomes. Furthermore, there may be limitations in our ability to apply the knowledge gained from operating in these regions to successfully expand our operations into other parts of India.

Our business focus in Tamil Nadu exposes us to several risks, encompassing, but not restricted to:

- Potential decline in construction activities at the regional level in Tamil Nadu.
- Susceptibility to alterations in policies, laws, regulations, or the political and economic landscape of Tamil Nadu.
- Limitations on our capacity to diversify operations across different states.
- The perception among potential clients that we are primarily a regional construction company, potentially impeding our ability to compete for or secure orders for large and intricate projects on a national scale.

Moreover, factors such as competition, cultural distinctions, regulatory frameworks, business norms, and local behaviors and preferences in potential expansion cities may differ significantly from Tamil Nadu. Our experience in Tamil Nadu may not necessarily be transferable to these new states. Additionally, as we venture into unfamiliar markets and regions, we are likely to encounter competition not only from national entities but also from local players with established presence, extensive knowledge of local regulations, business norms, and customs, as well as stronger relationships with local contractors, suppliers, relevant government authorities. These competitors may also possess existing market foothold or enjoy a more robust financial standing, granting them a competitive edge. The inability to successfully expand beyond the Tamil Nadu market could have adverse effects on our business prospects, financial health, and operational outcomes.

- 2. We lack ownership of the registered office used by our company. Any interference with our entitlements as the licensee/lessee or the cancellation of contracts with our licensors/lessors could have a negative effect on our activities and, as a result, our overall business.***

Our registered office is located at the Plot No E-30, IInd floor, IInd Avenue, Besant Nagar, Chennai, Tamil Nadu- 600090. We do not own this office; instead, we have leased it for 11 months starting from May 16, 2023, and ending on March 16, 2024. However, we cannot guarantee that we will be able to renew this lease on terms that are commercially acceptable or favorable in the future. For more information, please refer to the "Our Business" section on page 114 of this Draft Red Herring Prospectus.

In the event that we are required to vacate any of our current rented premises, we would need to find new offices and infrastructure. There is no assurance that these new arrangements will be on

commercially acceptable or favorable terms. If we are compelled to relocate our business operations during this period, it may lead to a disruption in our operations or require us to incur higher costs. This could negatively impact our business, prospects, financial results, and overall financial condition.

3. *Our business demands substantial working capital, and any delays in securing the necessary funds could negatively affect our financial performance.*

Our company operates in the infrastructure sector, and a significant portion of our current assets does not qualify for bank financing. To secure projects, the company must furnish performance bank guarantees, necessitating the provision of a cash margin. Additionally, clients retain a percentage of the contract value as Retention Money upon project completion. There is high inventory and other current assets days in our company. All these factors contribute to a substantial need for working capital.

The last three years' working capital requirement of the company is as given below: -

Amount in ₹ lakhs

Particulars	Restated			
	31-03-21	31-03-22	31-03-23	31-10-2023
Current Assets	3,543.35	4,231.45	9,410.37	11,129.51
Current Liabilities	2,642.01	2,844.55	6,822.90	7,971.39
Working Capital	901.34	1,386.90	2,587.47	3,158.12

4. *Our Company has reported negative cash flows from its operating, investing, and financing activities. Any operating losses or negative cash flows in the future could adversely affect our results of our operations and financial condition.*

Our Standalone cash flows from operating activities, investing activities and financing activities for the period ended October 31, 2023 and the financial year ended March 31 2023, 2022 and 2021 are set forth below:

Amount in ₹ lakhs

Particulars	For the period ended Oct 31, 2023	Financial Year ended March 31, 2023	Financial Year ended March 31, 2022	Financial Year ended March 31, 2021
Cash flow from operating activities	(490.63)	(869.79)	139.27	(130.50)
Cash Flow from investing activities	(788.90)	(727.59)	(583.08)	(1,168.49)
Cash Flow from financing activities	710.48	1,946.01	419.09	1,336.90
Net Increase / (Decrease) in cash and cash equivalents	(569.05)	348.63	(24.72)	37.91

We cannot assure you that we will not have negative cash flows in the future. This could have a negative effect on our capacity to cover day-to-day operational expenses, settle loans without obtaining funds from external sources. If we cannot generate enough cash flows, it may harm our business and financial activities.

5. *Our company's main source of revenue comes from projects in India that are initiated or approved by government authorities and other organizations funded by the Government of India (GoI) or*

state governments. The majority of our income comes from agreements with a small number of government entities. If there are unfavorable changes in the policies of the central or state government, it could result in the closure, termination, restructuring, or renegotiation of our contracts, potentially impacting our business and financial performance significantly.

We currently derive majority of our revenue from contracts with the Government of Tamil Nadu. The bulk of our Order Book comes from larger contracts with a few key customers, making our results more susceptible to fluctuations and individual contract risks. This concentration on a handful of projects or clients could negatively impact our operational outcomes and potentially lead to a significant decrease in contract awards. If we fail to meet expected profit margins or incur losses on these substantial contracts, it could adversely affect our business. Moreover, there is no guarantee that the Government of India (GoI) or state governments will continue prioritizing infrastructure or related sectors. Any unfavorable shifts in budget allocations for infrastructure development, a decline in available work, or changes in government policies may negatively impact our business and financial performance.

Contracts with government entities are subject to extensive internal processes, policy changes, budgetary constraints, funding inadequacies, and political pressures. These factors may result in fewer contracts available for bidding, increased time gaps between bid invitations and contract awards, or renegotiation of contract terms, causing delays in our business operations. While such events have not occurred in the past, our business is heavily reliant on projects awarded by government entities.

In cases where our bids are successful, there may be delays in the award of projects or notification of appointed dates. This could force us to retain unallocated resources, adversely affecting our financial condition and operational results. Adverse changes in GoI or state government policies may lead to the foreclosure or termination of our contracts. Additionally, we may face restrictions on selling interests to third parties, entering contracts with specific customers, or assigning our contract rights or obligations. While these events have not occurred in the past, these restrictions could limit our operational flexibility, thereby adversely impacting our business, prospects, results of operations, cash flows, and financial condition.

6. Our business, growth prospects and financial performance largely depends on our ability to obtain new contracts, and there is no assurance that we will be able to procure new contracts.

We actively participate in the competitive bidding process for various projects on an ongoing basis, with a focus on infrastructure projects. The Government of Tamil Nadu typically awards infrastructure projects through a competitive bidding process, contingent upon meeting specified qualification criteria. It is noteworthy that in the past, our bids for infrastructure projects have encountered rejection, either due to the favorable standing of our competitors.

It is important to acknowledge that there is no guarantee of our ability to fulfill these criteria in the future, whether independently or in collaboration with joint venture partners. Furthermore, we cannot provide assurance that we will choose to bid on projects for which we are qualified, or that our submitted bids, whether pending or already submitted, will be accepted.

In case we face challenges in securing new contracts, it will have a significant and adverse impact on our business.

7. ***Infrastructure projects are generally assigned to our organization upon fulfillment of specified pre-qualification prerequisites and subsequent engagement in a competitive tendering procedure. Any failure to secure new infrastructure projects or premature termination of contracts awarded to us could potentially have adverse repercussions on both our business operations and financial standing.***

Infrastructure projects are typically conferred upon our organization through a rigorous competitive bidding process, contingent upon meeting stipulated technical and financial pre-qualification criteria. Although factors such as a proven track record, project execution expertise, service quality, safety records, qualified personnel, reputation, and financial adequacy play pivotal roles in contract allocation, there exists no guarantee that we will successfully meet these technical and financial qualification criteria, either independently or in collaboration with joint venture partners. Furthermore, after fulfilling the pre-qualification requirements, projects are commonly awarded based on the price competitiveness of the submitted bid. The preparation and submission of bids entail incurring one-time, non-reimbursable costs. Despite being pre-qualified, we cannot ensure our participation in the bidding process, nor can we guarantee that our bids, whether already submitted or to be submitted, will secure the awarding of projects to our organization.

In case we encounter challenges in independently meeting the pre-qualification criteria necessary for participating in substantial construction and development projects, collaboration with third parties may become imperative for joint bidding endeavors. The pursuit of acceptable joint venture partners, however, may expose us to competition from other entities in a similar position seeking partners for pre-qualification requirements. In instances where we are unable to secure partnerships with suitable companies or lack the requisite credentials to be the preferred partner for other firms, the consequence may be the forfeiture of opportunities to bid for sizable infrastructure projects, potentially impeding our growth plans. Additionally, when participating in consortium-based bids, we face the risk of bid insecurity arising from the negligence or disqualification of our joint venture partners, factors beyond our control. In the event that a joint venture partner fails to fulfill its obligations satisfactorily, we may be compelled to incur supplementary expenditures to ensure the adequate performance and delivery of contracted services or make payments on behalf of the joint venture partners. Such circumstances have the potential to adversely impact the profitability of the contract.

8. ***Our projects face various implementation and other uncertainties, such as the risks of exceeding planned time and cost, which could have negative effects on our business, financial health, operational results, and overall prospects.***

The construction or development of our projects comes with diverse implementation risks, encompassing construction delays, interruptions in the supply of raw materials, setbacks in land acquisition by our project clients, unforeseen cost escalations, force majeure events, cost overruns, disputes with joint venture partners, delays in obtaining necessary licenses by our project clients, or encountering delays in making advance payments. Additionally, we may face regulatory risks, financing risks, and the potential that these projects might ultimately turn out to be unprofitable.

Although our contracts consistently incorporate escalation clauses to address any additional costs we might face, there's a possibility of encountering cost overruns or even losses in these projects due to unforeseen increases in expenses that may not fall within the coverage of these escalation clauses. Even with escalation clauses present in certain construction contracts, our government clients might interpret their applicability in their favor, posing challenges for us in enforcing these clauses to recover the costs incurred in line with the underlying contract. We may be exposed to the risks linked

to actual construction costs exceeding the initially agreed-upon scope of the work.

There has not been any instance in the past but it may happen that the incremental costs incurred by our Company may not be considered by our project clients despite the escalation clause of the contracts executed by them. Due to this, the company may initiate legal proceedings.

9. Our company utilizes several credit facilities provided by the bank, and in accordance with the sanctioned terms, certain restrictive covenants are imposed on our company. If we are unable to obtain approval, it might restrict our scope of activities and obstruct our growth plans.

We have entered into agreements for availing debt facilities from lender(s). Certain covenants in these agreements require us to obtain approval/permission from our lender(s) in certain conditions. In the event of default or the breach of certain covenants, our lender(s) have the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

Further, as on the date of the Draft Red Herring Prospectus, we have received No Objection certificate from lender(s).

10. Our lenders have charge over our movable properties in respect of finance availed by us.

As on October 31, 2023, based on restated standalone financial statements, we have secured outstanding debt of ₹ 4,809.88 lakhs as on October 31, 2023 and we have secured our lenders by creating charge over our movable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. For further information on the financing and loan agreements along with the total amounts outstanding, please refer to section titled “Financial Statements”, Financial Indebtedness” and “Our Business” on page 190, 274 & 114 of this Draft Red Herring Prospectus.

11. As an integral aspect of our business operations, it is necessary for us to provide bank guarantees. Failing to secure these guarantees or the activation of such guarantees has the potential to negatively impact our cash flows and financial standing.

In alignment with industry norms, our operational framework necessitates the provision of financial and performance bank guarantees in fulfillment of contractual obligations for our projects. Typically, these guarantees are issued to the pertinent authorities with whom contractual arrangements for our projects have been established. However, a potential challenge lies in consistently securing new financial and performance bank guarantees in quantities commensurate with our operational requirements. Difficulties in providing sufficient collateral to underpin these guarantees or letters of credit may impede our capacity to enter into new contracts and procure essential supplies. Such limitations could lead to a material adverse impact on our business, operational outcomes, and financial standing.

Moreover, the procedural intricacies associated with acquiring letters of credit, as well as financial

and performance bank guarantees, have a tendency to augment our working capital needs. The occurrence of unforeseen circumstances may render us incapable of meeting any or all our contractual obligations pertaining to ongoing projects, potentially leading to defaults under our contracts and subsequent invocation of the bank guarantees issued by us. In the event of such an invocation, there exists the potential for a substantial adverse impact on our business and financial standing.

12. Projects executed in collaboration through joint ventures may experience delays due to the performance of the joint venture partner. Additionally, substantial losses incurred from the joint venture have the potential to adversely impact our business, operational outcomes, and financial standing.

While the majority of our projects are undertaken independently, we also establish project-specific joint ventures and consortiums with entities in the infrastructure and construction sector. This strategy is particularly employed when projects necessitate specific eligibility criteria, such as particular experience and expertise. In such instances, we bid for projects through joint venture entities to meet the eligibility requirements.

The successful completion of these contracts is contingent upon the performance of our joint venture partner(s). Should our joint venture partner fail to fulfill its contractual obligations, it may result in a breach of the terms of the jointly awarded contract. Consequences may include the imposition of penalties and/or liquidated damages, or the client invoking our performance guarantees. Given that joint venture partners typically share joint and several liability, our liability extends to completing the entire project in the event of our partner's non-performance.

Failure to adequately mitigate risks associated with these scenarios could expose us to costs and potentially result in significant losses, adversely impacting our business, operational results, and financial standing. In the event of unforeseen circumstances leading to the incapacity of a joint venture partner to continue a project, we may bear additional responsibilities for project completion and assume a correspondingly larger share of the financial risk.

13. The success and financial viability of our enterprise are markedly contingent on the performance and prevailing conditions within the construction and infrastructure sector, both at a nationwide level in India and, more specifically, within the Tamil Nadu Region. As a result, we are subject to inherent risks stemming from economic fluctuations, regulatory alterations, and other dynamic changes, alongside the potential impact of natural disasters in the region. These factors collectively pose a potential threat to our business stability, operational outcomes, cash flows, and overall financial health.

As of October 31, 2023, we do not have any ongoing project outside the geographical area of Tamil Nadu. For further information on our projects, see ***“Our Business”*** on page 114 of this draft Prospectus. Consequently, the performance and prevailing conditions within the construction and infrastructure industry in the region exert a profound influence on our business, financial health, and operational outcomes. The dynamics of this industry are subject to numerous external factors beyond our direct control, including local economic conditions, fluctuations in governmental regulations, employment and income levels, and interest rates, among other variables. The impact of these factors has the potential to adversely affect our business stability, financial condition, and operational results.

Moreover, the execution of infrastructure projects entails a significant time investment. The pricing strategy for project bids and the subsequent cost of execution are inherently influenced by the aforementioned external factors, which lie outside our sphere of control. If circumstances necessitate the execution of ongoing or upcoming projects at costs higher than initially estimated, it could further exert adverse effects on our business, financial condition, and operational results.

14. Currently, we do not possess ownership of the trademark or logo by which our operations are presently identified. In the event of third-party infringement on the trademark, logo, or intellectual property we utilize, it could have an adverse impact on our business and reputation.

Our Company has made an application for registration of trademark  and ‘AVP CONSTRUCTIONS’ under Class 37. For further details, please see “***Government and Other Statutory Approvals***” beginning on page 285 of this Draft Red Herring Prospectus.

Regarding our applied-for trademarks, we cannot guarantee the successful resolution of objections or opposition, if any. Consequently, preventing infringement of our trademarks may be challenging, and the protection afforded by a passing off action may be insufficient until formal registration is obtained. There is no assurance that our current or future registered and unregistered intellectual property rights, including our know-how, will effectively safeguard the intellectual property underlying our products and business. Oppositions or challenges to our rights cannot be ruled out.

While we diligently strive to adhere to intellectual property rights, the possibility of facing infringement claims from third parties remains. Any such claims, irrespective of their merit or resolution, may necessitate significant costs in responding to, defending, and settling them. This could divert management attention and resources away from our core business activities. The occurrence of any of these circumstances may result in unforeseen expenses, adversely affecting our business, prospects, reputation, profitability, financial condition, and operational results.

15. There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies.

In the past, there have been some instances of certain discrepancies and delays in filing statutory forms with the RoC, which have subsequently been filed along with the payment of additional fees, as specified by RoC. No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect.

16. We are bound by a spectrum of legal statutes and regulatory frameworks, encompassing environmental, health, and safety mandates. Non-compliance with these laws or failure to secure, sustain, or renew the requisite licenses, permits, and approvals essential for our business operations may result in adverse impacts on our business, operational outcomes, and financial standing.

We are obligated to adhere to a comprehensive array of legal statutes and regulatory frameworks, which encompass mandates related to environmental, health, and safety standards. Our compliance with these laws is imperative, and the acquisition, maintenance, and renewal of essential licenses, permits, and approvals vital to our business operations are paramount. Any lapses in compliance or

failure to secure these requisite authorizations may result in detrimental effects on our business, operational outcomes, and financial standing.

To conduct our business, we necessitate specific approvals, licenses, registrations, and permissions as mandated by various regulations, guidelines, circulars, and statutes governed by the Government of India, State Governments, and other regulatory authorities. For detailed information on material approvals related to our business and operations, please refer to "Government and Other Statutory Approvals" on page 285. Failure on our part to timely renew, maintain, or obtain required permits or approvals may lead to operational disruptions and adversely impact our business, financial condition, and operational results.

17. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing or returns and deposit of statutory dues with the taxation and other statutory authorities.

In the past, our company has at some instances, delayed in filing our GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are small, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

18. The prosperity of our business may be compromised if we do not stay abreast of technological advancements within the construction industry.

Our recent observations suggest a trend among our clients towards the execution of larger and more technically intricate projects, incorporating advanced technologies. The future success of our endeavors hinges, in part, on our capacity to adeptly navigate technological advancements, emerging standards, and evolving industry practices in a cost-effective and expeditious manner.

To meet the evolving needs of our clientele, it is imperative that we consistently enhance our existing systems and innovate new technologies tailored for our construction projects. Moreover, the dynamic nature of technological and market demands can swiftly render current technologies and equipment obsolete, necessitating substantial capital expenditures and potentially resulting in significant asset write-downs. The financial implications of upgrading or implementing new technologies, enhancing existing equipment, or expanding capacity can be substantial. Failure to accurately anticipate and respond to the changing requirements of our clients, or falling behind in adopting the latest technological advancements, may have material and adverse effects on our business, prospects, financial condition, and operational results.

19. We have engaged in specific transactions with related parties, and both these transactions and any prospective dealings with our related parties may present potential conflicts of interest.

We have executed specific transactions with related parties, including our Promoter, Promoter Group, Directors, their relatives, and Group Entities, and anticipate the possibility of continuing such transactions in the future. The rationale behind engaging in these transactions has been the convenience and expediency they offer. However, it cannot be guaranteed that more favorable terms

could not have been obtained through dealings with unrelated third parties. While our company is of the belief that all related party transactions have been conducted at arm's length, we cannot provide assurance that more favorable terms could not have been secured in transactions with third parties.

It is acknowledged that our company may engage in similar transactions in the future. In such instances, there is no assurance that these transactions would not have an adverse impact on our operational results. It is important to note that going forward, all related party transactions will be subject to approval either by the board or shareholders, in accordance with the Companies Act, 2013, and the Listing Regulations. For a comprehensive overview of these transactions, please refer to “Related Party Transactions” on page 187 of the Restated Financial Statements.

20. We have unsecured loans from directors, relatives of directors, and other individuals, which are subject to repayment on demand. The issuance of repayment demands by these lenders has the potential to adversely impact our business operations.

As per our restated financial statements, as of October 31, 2023, we have an unsecured loan amounting to ₹ 1,704.92 lakhs from directors, with repayment terms upon demand. The potential issuance of repayment demands by these lenders carries the risk of adversely impacting both our liquidity and business operations. In case, our director seeks repayment of loan advanced by him, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. For a more detailed account of these unsecured loans, please refer to the chapter titled Financial Statements' commencing on page 190 of this Draft Red Herring Prospectus.

21. We cannot provide a guarantee that our construction projects or work sites will be entirely free from defects.

We are dedicated to upholding the quality of our construction projects and strictly adhere to industry standards. However, we cannot provide absolute assurance that the completion of our projects or work sites will consistently align with the specified requirements, nor can we guarantee freedom from defects. In the event of the identification of defects or faults in our work, damages to our construction due to factors beyond our control, or for any other reasons, we may be exposed to significant contractual liabilities and losses under our project contracts. Such losses have the potential to impact our financial performance and operational results significantly and adversely. Moreover, the discovery of defects or dissatisfaction among customers may lead to the cancellation of project commitments or the refund of advance payments, posing further risks to our business, financial condition, and operational results.

22. Our business involves significant capital requirements. In the event of insufficient cash flows to fulfill essential debt obligations and meet working capital needs, there may be an adverse impact on our operational results.

Our operational model relies significantly on ample working capital base, contingent upon specific assumptions. Any alterations to these assumptions would consequently impact our working capital requirements. A substantial portion of our working capital is earmarked for procuring or manufacturing materials, resource mobilization, and other project-related activities before realizing payments from clients. Due to the extended and intricate bidding and selection process inherent in the contracts we pursue, influenced by numerous factors, predicting the award and subsequent mobilization timeline for a specific bid is inherently challenging. This uncertainty may necessitate

incurring additional indebtedness in the future to fulfill our working capital needs.

The objectives of this issue encompass funding our company's capital expenditures and working capital requirements, grounded in management estimates and specific assumptions detailed in the 'Objects of the Issue' on page 79. These estimates and assumptions are susceptible to changes beyond our control, including force majeure events, heightened customer defaults, and the unavailability of funding from financial institutions. Consequently, these working capital requirements may not accurately reflect the actual needs of our company in the future, and investors are advised against placing undue reliance on such estimations.

Our capital expenditure demands, integral to our growth strategy, mandate consistent access to substantial amounts of capital on acceptable terms. We cannot guarantee that prevailing market conditions and other factors will facilitate future project and acquisition financings, whether through debt or equity, at terms satisfactory to us or at all. The successful arrangement of financing and its associated costs hinge on numerous factors, including general economic and capital market conditions, credit availability, the terms of existing indebtedness, investor confidence, project performance, and regulatory conditions conducive to capital raising. Our efforts to secure future financings may not succeed, may not be favorable in terms, or may not materialize at all. Additionally, our ability to raise funds, either through equity or debt, is constrained by certain legal restrictions under Indian law. If the demand for, or supply of, infrastructure financing at attractive rates or terms diminishes or ceases to exist, our business, prospects, financial condition, and operational results could be adversely affected.

23. We may encounter challenges in effectively overseeing the expansion of our operations and implementing our growth strategies, potentially leading to adverse effects on our business, financial condition, operational results, and future prospects.

As our business continues to expand, it becomes imperative to enhance our managerial, technical, and operational capabilities, alongside optimizing resource allocation and implementing an effective management information system. To sustain our ongoing operations and facilitate future growth, securing adequate internal liquidity and access to external financing, be it through debt or equity, is crucial. Comprehensive details on our strategies can be found in the "Our Business" beginning on page 114.

Furthermore, the expansion will necessitate the management of relationships with an increased number of clients, suppliers, contractors, service providers, lenders, and other stakeholders. Strengthening our internal control and compliance functions becomes essential to ensure adherence to legal and contractual obligations, thereby minimizing operational and compliance risks. While we strive to manage our growth and execute our strategies successfully, there remains a level of uncertainty regarding potential capital constraints, operational challenges, and difficulties in expanding existing business operations. Training an expanding workforce to manage and operate the expanded business is also a critical aspect of this growth.

Moreover, executing our growth strategies could face obstacles and delays attributed to various factors, such as the unavailability of human and capital resources, challenges in developing adequate systems, infrastructure, and technologies, delayed or non-payments by clients, ineffective implementation of bidding strategies, failure to accurately identify market trends, increases in the costs of raw materials, fuel, and labor, failure to establish and maintain alliances with joint venture partners, and non-performance by joint venture partners in meeting contractual obligations. These

challenges may result in project execution delays. The execution of our growth strategy, therefore, carries inherent uncertainties regarding timing, costs, and the ability to meet client expectations.

24. Projects listed in our order book, as well as our prospective ventures, are susceptible to delays, alterations, or cancellations due to factors beyond our control. Such occurrences have the potential to impact our business, prospects, reputation, profitability, financial condition, and operational results significantly and adversely.

As on October 31, 2023, we have total 14 projects including 12 on-going projects worth approximately ₹ 20,188.91 lakhs, and 2 additional projects worth approximately ₹ 3,421.34 lakhs wherein AVP Infracon Limited becomes L1, representing anticipated revenues from the unfinished segments of our ongoing projects. However, our future performance may be influenced by potential delays, modifications in project scope, or cancellations, arising from defaults by either the client or us, force majeure events, or legal impediments. Various obligations in our projects, such as land acquisition, advance payments, opening letters of credit, or relocating utilities, may face delays due to non-performance, breaches, or force majeure events. In the context of an EPC project, project delays may lead to significant additional costs, and counterparties may impose liquidated damages for failure to meet milestones or even terminate the construction contract. Resetting the completion schedule may prevent us from recognizing revenue if the required percentage of completion is not achieved within the specified timeframe.

Our projects may lack comprehensive protection against such delays, associated liabilities, and additional costs. Moreover, escalation clauses in some contracts may be subject to restrictive interpretations by counterparties, potentially leading to disputes over our claims for additional costs. Consequently, our future earnings may deviate from the amounts reflected in the order book. The unpredictable nature of changes in project scope and schedule makes it challenging to accurately predict when or if the expected revenues outlined in the order book will be realized. Additionally, even in cases where a project progresses as planned, there is a risk of contracting parties defaulting and failing to pay receivables on time. If any or all of these risks materialize, it could have a material and adverse impact on our business, prospects, reputation, profitability, financial condition, and operational results.

25. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Red Herring Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to "Capital Structure" beginning on page 66 of this Draft Red Herring Prospectus.

26. We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.

Our performance depends largely on the efforts and abilities of our promoters, senior management and other key personnel. They have gained experience in this line of business and have over the years built relations with our customers and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for project development and procurement activities, and our overall business operations and the strategic

directions taken by our Company. For details in relation to the experience of our key management personnel, see “Our Management” on page 155 of this Draft Prospectus. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

27. We possess an extensive inventory of equipment and maintain a sizable workforce, leading to elevated fixed expenditures for our organization. Should we encounter challenges in generating sufficient cash flows, it could potentially exert a significant adverse influence on our operational activities.

As of October 31, 2023, we have 43 full-time employees (including executive directors) and 85 on-site contractual workers such as Engineers, Drivers, JCB Operators, helpers etc. and we possess an extensive fleet of contemporary construction equipment. We predominantly own rather than lease or hire equipment, thereby contributing to heightened fixed costs for our company. The potential inability to generate or sustain adequate revenue, whether due to unsuccessful project bids, delayed client payments, or non-recovery of payments, holds the potential for a materially adverse impact on our financial condition and operational performance.

Moreover, our workforce is aligned with existing and anticipated workloads. The absence of future contract awards or delays in such awards may result in substantial interim costs. Our forward-looking performance projections hinge on various factors, including the timing and acquisition of new contracts.

28. Our projects require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.

Our projects rely on having a workforce, and our ability to keep workers. If we can't find or retain enough workers, it could negatively impact our business. We can't guarantee that we'll be able to continue with the same workforce or on favorable terms. Any such failure could affect our operations, business processes, and profits. Additionally, recent changes in labor laws in India might increase our costs related to compliance, wages, social security, and workplace safety. We can't guarantee that we'll always comply with these laws, and as our business grows, our labor and employee costs, along with operational expenses, might significantly increase. While our employees are currently not part of a union, there's no assurance they won't seek unionization in the future. If they do, it could make it challenging for us to maintain flexible labor policies, potentially increasing costs and negatively affecting our business.

29. Our operations are subject to physical hazards and similar risks that could expose us to material liabilities, loss in revenues and increased expenses.

While construction companies, including us, conduct various scientific and site studies during the course of bidding for projects, there are always anticipated or unforeseen risks that may come up due to adverse weather conditions, geological conditions, specification changes and other reasons. Additionally, our operations are subject to hazards inherent in providing engineering and construction services, such as risk of equipment failure, work accidents, fire or explosion, including

hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Our policy of covering these risks through contractual limitations of liability, indemnities and insurance may not always be effective and this may have a material adverse effect on our reputation, business, financial condition and results of operation.

30. Our operations rely on third-party transportation providers for the timely delivery of raw materials from our suppliers and the efficient distribution of our products to clients. Any failure on the part of these service providers to fulfill their obligations may significantly impact our business, financial condition, and operational results.

We operate in the construction sector, specializing in design and execution of residential and commercial projects. The success of our endeavors is contingent upon the seamless procurement and transportation of raw materials essential for commercial project processes, originating from manufacturers and reaching our project sites. This supply chain is inherently exposed to diverse uncertainties and risks. Furthermore, the transit of raw materials is susceptible to potential losses or damages arising from accidents or natural disasters. Delays in the delivery of raw materials also pose a risk, potentially impacting our business and operational outcomes negatively. The inability to sustain an uninterrupted and efficient supply of raw materials may exert a material and adverse influence on our business, financial condition, and operational results.

31. Substantial rises in the costs, scarcity, or delays in the availability of labor and essential building materials may impact our projected construction expenses and timelines, potentially leading to cost overruns and reduced profitability.

As our company is actively involved in the construction of projects, our business is susceptible to adverse impacts resulting from fluctuations in the availability, cost, and quality of raw materials and labor. We procure various building materials for our projects, including steel, cement, flooring products, hardware, bitumen, sand and aggregates, doors and windows, bathroom fixtures, and other interior fittings, from external suppliers. The pricing and availability of these essential building materials, as well as other raw materials, are subject to factors beyond our control, including the cost of their raw materials, overall economic conditions, competitive forces, production costs and levels, transportation costs, indirect taxes, and import duties.

Our capacity to execute profitable project development and construction hinges on securing a sufficient and timely supply of building materials within our estimated budget. Given our reliance on third-party suppliers, our supply chain may be vulnerable to disruptions beyond our control, such as challenges related to transportation infrastructure, adverse weather conditions, and road accidents. Certain building materials, particularly cement and steel, are susceptible to rapid price increases. Additionally, operating in a labor-intensive industry, challenges in negotiating with labor or their sub-contractors may lead to work stoppages or increased operating costs due to higher-than-anticipated wages or benefits.

During periods of material shortages in building materials or labor supply, our ability to complete projects within predetermined timeframes and estimated costs may be compromised, potentially affecting our operational results and reputation negatively. Moreover, during periods of significant price increases in building materials or labor, we may face challenges passing these cost escalations onto our customers, thereby diminishing or eliminating the anticipated profits from our projects. These factors collectively pose potential adverse effects on our business, operational results, and cash flows.

32. We depend on the services of external third-party service providers and contractors to carry out specific components of our projects. Any failure on their part to fulfill their contractual obligations could have adverse implications for our business, operational results, and cash flows.

We engage various independent service providers and contractors for the execution of our projects. Additionally, third-party consultancy firms handle numerous regulatory requirements and approvals, acting as intermediaries with government authorities on our behalf. Furthermore, we consistently engage contractual labor for various aspects of our construction work, including services related to electrical, plumbing, and other specialized tasks.

In the event that a service provider or contractor fails to fulfill its obligations satisfactorily or within stipulated timeframes for a project, or terminates its engagement with us, it may impede our ability to achieve the desired quality, adhere to project timelines, and stay within the pre-estimated cost. Such situations may necessitate incurring additional costs or time to meet the required property development standards consistent with our objectives, potentially leading to reduced profits or, in some instances, significant penalties and losses that may not be recoverable from the respective service provider or contractor.

There is no guarantee that services provided by independent contractors will consistently meet our satisfaction or quality requirements. Additionally, we may face claims related to defaults and delayed payments to our contractors, which could have adverse effects on our business, operational results, and cash flows.

33. Inadequate inventory management may adversely impact our net sales, profitability, cash flow, and liquidity.

The operational performance of our business is contingent on our effective management of inventory for operational purposes and the stock of finished products. Achieving this entails accurate estimation of customer demand, procurement in line with supply requirements, and prudent inventory acquisition. Should our management misjudge anticipated customer demand, it could adversely impact results by causing either product shortages or an accumulation of excess inventory. Moreover, failure to sell acquired inventory may necessitate inventory write-downs, supplier payments without new purchases, or the creation of additional vendor financing, all of which could adversely affect income and cash flows.

Our sales estimates are based on customer demand, specifications, and requirements. Additionally, disruptions in product delivery to our warehouse or customers, stemming from factors such as poor handling, transportation bottlenecks, or labor strikes, may result in delayed or lost deliveries, damaged products, and supply disruptions. Overstocking inventory could escalate capital requirements and incur additional financing costs, while understocking may negatively impact our ability to meet customer demand and operational results. Any divergence between our planning and actual consumer consumption may lead to potential excess inventory or out-of-stock scenarios, both of which could adversely affect our business, financial condition, and operational results.

34. Our Promoters, Directors, and Key Managerial Personnel may hold interests in our Company beyond the reimbursement of expenses or regular remuneration.

Our Promoters and Directors may be considered to have an interest corresponding to the equity shares

they hold and the benefits derived from their ownership stake in our Company. Their interest extends to transactions involving our Company, including those between the Company and our Group Entities. Additional information on this matter can be found in the chapters titled “Our Business” and “Our Promoters” and “Our Promoter Group”, starting on page 114, 178 and 182, respectively. Furthermore, details on related party transactions are provided in the chapter titled 'Related Party Transactions' within the “Financial Statements” section, beginning on page 190 of this Draft Red Herring Prospectus.

35. The divestment of shares by our promoters or other major shareholder(s) has the potential to negatively impact the market value of the Equity Shares.

The divestment of shares by promoters or other substantial shareholder(s) has the potential to exert a notable influence on the trading price of our Equity Shares. Additionally, the broader market price may experience adverse effects following news regarding the sale of shares by promoters. It is important to note that the closing of trading windows during financial results periods may impose restrictions on promoters, limiting their ability to sell shares in the open market.

36. Our success depends on our ability to attract and retain our key management personnel. If we are unable to do so, it would adversely affect our business and results of operations.

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for management, running of our daily operations, and the planning and execution of our business strategy. There is intense competition for experienced senior management and other key personnel with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired.

Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. If we are unable to do so, it would materially and adversely affect our business, prospects and results of operations.

37. The extent of our insurance coverage may not be sufficient to mitigate all conceivable losses that could potentially affect us. Such inadequacy may impart a material impact on our business and financial condition.

We uphold insurance coverage for each project in progress, encompassing protection against damage resulting from severe weather conditions, floods, fires, earthquakes, third-party liability, and business interruption—standard coverage for the infrastructure industry in India and the jurisdictions in which we operate. However, certain risks may not be insurable or may not be insurable on commercially reasonable terms. The adequacy of our insurance coverage may be limited in specific circumstances, subject to deductibles, exclusions, and coverage limits.

There is no guarantee that the operation of our projects or infrastructure assets will remain unaffected by the exclusions of insurance policies, and the terms of our insurance policies may not be sufficient

to cover damages resulting from such incidents and hazards. Additionally, there is no assurance that any claims made under our insurance policies will be fully honored, partially honored, or honored within the expected timeframe.

In the event of an uninsured loss or a loss exceeding insured limits, we would incur the loss of anticipated revenue from the construction contract, and in the case of projects, the loss of our investment in the relevant project company. Furthermore, past or potential losses may not be covered by the insurance policies. For a more comprehensive understanding, please refer to the section titled 'Our Business' on page 114.

38. Our projects are exposed to various implementation and other risks, including risks of time and cost overruns, and uncertainties, which may adversely affect our business, financial condition, results of operations, and prospects.

Our road infrastructure projects are exposed to various implementation risks, encompassing regulatory and permitting challenges, land acquisition complexities, engineering and design issues, construction delays, contractual disputes, political and economic uncertainties, technology risks, supply chain disruptions, force majeure events, and market fluctuations. These risks pose potential threats to project timelines and costs, impacting our business, financial condition, and prospects. While we employ risk management strategies, there is no guarantee of complete mitigation, necessitating careful consideration and due diligence by investors.

39. We function within a fiercely competitive landscape and may encounter challenges in sustaining our market position, potentially leading to adverse effects on our business, operational results, and financial standing.

We encounter intense competition in the competitive bidding landscape, both from domestic and international companies, particularly in the infrastructure projects sector in India. Foreign companies often collaborate with domestic counterparts to participate in these projects, creating a competitive environment. Similar competitive dynamics are observed in other jurisdictions where we have a presence. The liberalization of these sectors in recent years has attracted increased participation from foreign companies, leading to heightened competition for larger contracts.

This intensified competition has resulted in significant margin pressure, posing a potential material adverse impact on our business, prospects, financial condition, and operational results. Foreign companies, some of which may possess larger resources and assets, might achieve better economies of scale, enabling them to competitively bid at more favorable rates. Additionally, new entrants to these industries may adopt a strategy of reducing margins to gain market share. The competitive nature of the bidding process may compel both us and our competitors to lower prices in order to secure contracts.

40. Our company does not have a designated monitoring agency, and the allocation of funds is subject to the discretion of our Management and Board of Directors, with oversight by our Audit Committee.

In accordance with the SEBI (ICDR) Regulations, 2018, as amended, the appointment of a monitoring agency is mandated only for issue sizes exceeding Rs. 100 crore. Consequently, we have not engaged any monitoring agency for overseeing the utilization of proceeds from the issue. Nevertheless, the Audit Committee of our Board will oversee the deployment of issue proceeds in

compliance with the Listing Agreement. Moreover, our company is committed to promptly informing the NSE about any material deviations in the utilization of issue proceeds.

41. The issue price of the Equity Shares may not necessarily reflect the future market price of our equity shares post-issue, and there exists the possibility that the market price of our Equity Shares may fall below the issue price.

The assessment of the issue price for our Equity Shares entails a thorough examination of both qualitative and quantitative factors. The company has achieved notable progress in solidifying its standing within the Infrastructure sector, and these achievements have been conscientiously factored into the determination of the issue price for Equity Shares. For a comprehensive understanding of the rationale behind the issue price, please consult the section titled “Basis for Issue Price”, commencing on page 87 of the prospectus. It is imperative to recognize that the market price of our equity shares may experience variability subsequent to the issuance, with the potential for a decline below the initially established issue price.

42. The ongoing success of our operations is significantly reliant on the continued contributions, strategic guidance, and financial support from our Promoter and Senior Management.

The success and growth of our Company is heavily reliant on continuing service and efforts of our Promoter and Key Managerial Personnel. Their experience and vision plays pivotal role in the growth and operations of our business. If any member of our senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations may be affected materially and adversely.

43. The potential for future dividend payments relies on our forthcoming earnings, financial health, cash flows, working capital needs, and capital expenditure considerations.

Our prospective capacity to declare dividends will be contingent upon our earnings, financial health, and capital necessities. There is no guarantee that we will generate adequate income to cover operational expenses and distribute dividends to shareholders. The potential to pay dividends is also influenced by our expansion initiatives. It is plausible that we may not be in a position to distribute dividends in the short or medium term. The formulation of future dividend policies will be contingent upon the capital requirements, financing structures, business plans, financial condition, and operational results.

44. Adverse impacts on our operations may arise from occurrences such as strikes, work stoppages, heightened wage demands from our employees, or any other form of disputes with our workforce.

The efficiency of our operations is contingent upon the effectiveness of our workforce, which may be susceptible to disruption in the form of labor disputes involving subcontractors or employees. Business interruptions may occur due to strikes, work stoppages, or demands for wage increments. Failure to negotiate effectively with subcontractors, employees, or labor entities and find timely and acceptable resolutions may result in the suspension of construction activities at our worksites, leading to significant project delays.

45. After the issuance, our Promoter and members of the Promoter Group will collectively maintain predominant control over our company, providing them with the authority to influence the outcomes of matters presented for shareholder approval.

Following this issuance, our Promoter and the Promoter Group will collectively possess 62.33% stake in our equity share capital. Consequently, our Promoter, in collaboration with the Promoter Group, will retain a substantial level of influence over the Company. This influence extends to controlling the outcomes of proposals subject to majority shareholder voting, including the election of Board members, as per the provisions of the Companies Act, 2013, and our Articles of Association. Such concentrated ownership may introduce delays, prevention, or deterrence to potential changes in the control structure of our Company.

Moreover, our Promoter will retain the capability to instigate actions that may not align with, or could conflict with, our interests or the interests of certain creditors or other shareholders. We cannot guarantee that such actions will not adversely impact our future financial performance or the market price of our Equity Shares.

46. We have not conducted independent verification of specific data presented in this Draft Red Herring Prospectus.

We have not independently verified the industry and related data presented in this prospectus. Although we believe the sources referenced in the report to be reliable, we cannot guarantee their completeness or reliability. Additionally, we cannot guarantee that the statistics are stated or compiled on the same basis or with the same degree of accuracy as elsewhere.

47. Our funding needs and the intended utilization of the Net Proceeds are derived from management estimates and have not undergone independent appraisal. These projections may be subject to alteration due to various factors, some of which are beyond our control.

Our funding needs and the utilization plan for the Net Proceeds are formulated through internal management estimates, considering current market conditions. These estimates have not undergone appraisal by any bank, financial institution, or independent agency. In the absence of such independent appraisal, our funding requirements may be subject to change, contingent upon shareholder approval through the passage of a special resolution pursuant to Section 27 of the Companies Act, 2013, either through a postal ballot or an authority granted by the Company in a general meeting by means of a special resolution. These adjustments may be influenced by various factors beyond our control. For more detailed information, please refer to the section titled 'Objects of the Issue' starting on page 79 of this Draft Red Herring Prospectus.

EXTERNAL RISKS

48. A deceleration in the economic growth of India or global economic instability may have a detrimental impact on our business, financial condition, and operational results.

We presently operate within India, a jurisdiction typically characterized by a developing economy, potentially lacking firmly established legal and regulatory systems compared to other nations. Our operational performance, growth trajectory, and the market value of our Equity Shares are heavily contingent on the overall performance of the Indian economy, its GDP growth rate, and the economic cycle within the country. Historical instances have seen India undergo economic slowdowns due to various factors, including the impact of the COVID-19 pandemic, unsustainably high current account deficits, capital outflows, and subsequent exchange rate pressures. While recent indications suggest a positive economic turnaround, there is no certainty that growth will remain uninterrupted, and the possibility of increased inflation persists. An economic deceleration in India could adversely affect our business, as well as our customers and contractual counterparts, particularly if such a downturn is prolonged. In periods marked by high inflation rates, our operational expenses may escalate, potentially impacting our cash flows and operational results adversely.

49. Adverse global economic, political, and social conditions have the potential to impede our business operations, escalate costs, and negatively impact our stock valuation.

Factors of a global economic and political nature, beyond our direct influence, play a pivotal role in shaping forecasts and directly impacting performance. Such factors encompass interest rates, economic growth rates, government fiscal and monetary policies, alterations in regulatory frameworks, inflation, deflation, foreign exchange fluctuations, consumer credit accessibility, consumer debt levels, unemployment patterns, threats and activities related to terrorism, global military and domestic disturbances, conflicts, and other elements that shape consumer confidence, spending patterns, and tourism trends.

50. The impact of natural or man-made disasters has the potential to negatively influence our financial performance, cash flows, and overall financial health. Instances of hostilities, terrorist attacks, civil unrest, and other acts of violence have the potential to adversely affect financial markets and pose risks to our business.

The potential occurrence of natural disasters such as cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic diseases, and man-made disasters, including acts of terrorism and military actions, poses a risk to our results of operations, cash flows, and financial condition. Acts of terrorism and violence may have adverse effects on the Indian securities markets. Additionally, any deterioration in international relations, particularly between India and its neighboring countries, may lead to investor concerns about regional stability, potentially impacting the price of Equity Shares. India has experienced local civil disturbances in recent years, and the possibility of future civil unrest or other adverse social, economic, or political events in India could negatively affect our business. Such incidents may also contribute to a perception that investing in Indian companies entails a higher level of risk, potentially impacting our business and the market price of Equity Shares.

51. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under

any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

52. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

53. The market value of the Equity Shares may fluctuate due to the volatility of the Indian securities markets.

The Indian securities markets may not be directly comparable to those in certain countries with more developed economies and capital markets. Historically, Indian stock exchanges have witnessed fluctuations in the prices of listed securities. Potential issues or challenges faced by Indian stock exchanges, if persistent or recurring, could impact the market price and liquidity of securities, including the Equity Shares. Regulatory bodies overseeing Indian stock exchanges have intermittently imposed restrictions on trading, limitations on price movements, and margin requirements. Additionally, disputes between listed companies, stock exchanges, and regulatory bodies may, at times, negatively influence market sentiment.

54. Taxes, levies, and financial policies/regulations imposed by the Government of India or other State Governments may significantly impact our business, financial condition, and results of operations in an adverse manner.

Taxes and levies imposed by the Central or State Governments in India, affecting our industry, encompass income tax, GST, and other taxes, duties, or surcharges that may be introduced on a permanent or temporary basis. The continuity of existing tax rates and slabs cannot be guaranteed, and any alterations in these rates or slabs may have adverse implications for our financial condition and operational results.

55. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

GLOBAL ECONOMIC OVERVIEW

Global growth is forecast to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024. For advanced economies, the expected slowdown is from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024, amid stronger-than-expected US momentum but weaker-than-expected growth in the euro area. Emerging market and developing economies are projected to have growth modestly decline, from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024, with a downward revision of 0.1 percentage point in 2024, reflecting the property sector crisis in China. Forecasts for global growth over the medium term, at 3.1 percent, are at their lowest in decades, and prospects for countries to catch up to higher living standards are weak. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024. But the forecasts for 2023 and 2024 are revised up by 0.1 percentage point and 0.6 percentage point, respectively, and inflation is not expected to return to target until 2025 in most cases.

Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of prepandemic projections, especially in emerging markets and developing economies. The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with prepandemic predictions. Other emerging markets and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent.

INFLATION

Global headline inflation has more than halved, from its peak of 11.6 percent in the second quarter of 2022 to 5.3 percent in the second quarter of 2023. About four-fifths of the gap between the 2022 peak and the prepandemic annual average level of 3.5 percent has closed. Among major economies, headline inflation in the second quarter of 2023 ranged from –0.1 percent in China to 2.8 percent in the euro area and 2.7 percent in the United States. A fall in energy prices and—to a lesser extent—in food prices has driven the decline in headline inflation. Notwithstanding a rebound in July, crude oil prices have declined during 2023 and are well below their June 2022 peak, on the back of lower global demand partly driven by tighter global monetary policy affecting activity. Natural gas prices also remain well below their 2022 peak, reflecting ample storage and supplies from Norway and northern Africa. Food prices have declined modestly in 2023, with lower

demand offset by supply reductions, notably those resulting from Russia's withdrawal from the Black Sea Grain Initiative in July, which reduced the supply of wheat to the global market. The normalization of supply chains has further contributed to the decline in headline inflation in most countries.

GROWTH IN EMERGING ECONOMIES

Growth in emerging and developing Asia is projected to rise from 4.5 percent in 2022 to 5.2 percent in 2023, then to decline to 4.8 percent in 2024, with downward revisions of 0.1 percentage point and 0.2 percentage point for 2023 and 2024, respectively, compared with July projections.

Growth in China: - The revision reflects a lower forecast for China, which is revised downward by 0.2 percentage point for 2023 and by 0.3 percentage point for 2024 to growth of 5.0 percent in 2023 and 4.2 percent in 2024. With the property market crisis in that country, lower investment is the main contributor to the revision.

Growth in India: - Growth in India is projected to remain strong, at 6.3 percent in both 2023 and 2024, with an upward revision of 0.2 percentage point for 2023, reflecting stronger-than-expected consumption during April-June.

INDIAN ECONOMIC OVERVIEW

According to the report by the World Bank, India was one of the fastest growing major economies in FY 2022-23 at 7.2%. India's growth rate was the second highest among G20 countries and almost twice the average for emerging market economies. This resilience was underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector.

Robust economic expansion during the initial quarter of the fiscal year 2023 enabled India to surpass the United Kingdom, securing its position as the fifth-largest global economy, having successfully rebounded from the adverse effects of the COVID-19 pandemic. According to the World Bank's Industrial Development Update, it is expected that the global headwinds will continue to persist and intensify due to high global interest rates, geopolitical tensions, and sluggish global demand. In this context, the World Bank forecasts India's GDP growth for FY 2023-24 to be 6.3%.

INDIAN ECONOMIC GROWTH DRIVERS

According to Economic Survey 2022-23, India's economic growth in FY23 has been principally led by private consumption and capital formation and they have helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund.

The Survey identifies various positive factors contributing to India's growth prospects:

- (i) **Limited global fallout from Covid-19 surge in China:** The world has experienced limited health and economic consequences from the recent surge in Covid-19 infections in China. This has allowed for the continued normalization of global supply chains, benefitting India's economic outlook.
- (ii) **Inflationary impulses from China's reopening:** The world has experienced limited health and economic consequences from the recent surge in Covid-19 infections in China. This has allowed for the continued normalization of global supply chains, benefitting India's economic outlook.
- (iii) **Recessionary tendencies in major advanced economies:** Economic downturns in major Advanced Economies (AEs) have prompted a cessation of monetary tightening, leading to an influx of capital flows into India. This is facilitated by India's stable domestic inflation rate, which remains below 6%.
- (iv) **Enhanced Private Sector Investment:** These favorable conditions have sparked an improvement in business sentiment and investment sentiment, providing further impetus to private sector investment.

The Survey reports robust credit growth to the Micro, Small, and Medium Enterprises (MSME) sector, averaging over 30.6% during the period from January to November 2022. This impressive growth is underpinned by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) initiated by the Union government, which has supported the financial needs of small and medium-sized enterprises.

Another substantial contributor to India's economic growth in FY23 has been the significant increase in the capital expenditure (Capex) of the central government. The Capex rose by an impressive 63.4% during the first eight months of the fiscal year. This uptick in government spending has acted as a catalyst for private sector Capex since the January-March quarter of 2022, effectively stimulating economic activity.

INDIAN INDUSTRIAL OUTPUT

During the fiscal year 2022-23 (FY23), India's industrial production demonstrated remarkable resilience, primarily fueled by robust domestic demand. The availability of bank credit, including significant support to Micro, Small, and Medium Enterprises (MSMEs) through the Emergency Credit Line Guarantee Scheme (ECLGS), played a crucial role in sustaining this growth trend. While foreign direct investment (FDI) in the manufacturing sector experienced a temporary slowdown in the first half of FY23 due to global uncertainties, India's structural reforms and business-friendly environment kept it an attractive FDI destination. Falling international commodity prices alleviated input cost pressures, supporting healthy profit margins. Moreover, increasing capacity utilization in the manufacturing sector is encouraging new investments aimed at

expanding production capabilities. Government initiatives like the Production-Linked Incentive (PLI) schemes are set to further boost manufacturing capacity, exports, and job creation. However, challenges such as a potential global economic slowdown, fluctuating commodity prices, and supply chain disruptions loom on the horizon. Despite these uncertainties, the Indian industrial output is expected to maintain a steady growth trajectory, driven by its resilient domestic demand.

Moreover, the Indian government is actively emphasizing the adoption of renewable energy sources, with a goal of sourcing 40% of its energy needs from non-fossil fuel sources by 2030. Additionally, India is firmly committed to the ambitious objective of achieving Net Zero Emissions by the year 2070, and this commitment is underpinned by a comprehensive strategy known as 'Panchamrit.' In recognition of its efforts and potential in the renewable energy sector, India holds the impressive rank of third place in the Renewable Energy Country Attractive Index.

Top of Form

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

1. In order to enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
2. Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of US\$ 182.35 million (Rs. 1,500 crore).
3. Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from 1st January 2023.
4. In the Union Budget of 2022-23, the government has allocated Rs. 44,720 crore (US\$ 5.98 billion) to Bharat Sanchar Nigam Limited (BSNL) for capital investments in the 4G spectrum.
5. Minister for Finance & Corporate Affairs Ms Nirmala Sitharaman announced in the Union Budget of 2022-23 that the Reserve Bank of India (RBI) would issue Digital Rupee using blockchain and other technologies.
6. In the Union Budget of 2022-23, Railway got an investment of Rs. 2.38 trillion (US\$ 31.88 billion) and over 400 new high-speed trains were announced. The concept of "One Station, One Product" was also introduced.
7. India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23
8. The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

ROAD AHEAD

During the second quarter of the fiscal year 2023, India managed to sustain the growth momentum it had achieved in the preceding quarter. High-frequency indicators (HFIs) showed strong performance in the months of July and August 2022. This performance reflects India's relatively favorable position in the international trade sector, indicating a positive outlook for economic growth and increased job opportunities. Notably, India ranked fifth in terms of foreign direct investment inflows among both developed and developing nations in the first quarter of 2022.

The economic narrative of India in the first half of the current fiscal year underscores the government's steadfast commitment to boosting capital expenditure, which, by August 2022 in FY23, had surged by 46.8% compared to the same period the previous year. The shift in the ratio of revenue expenditure to capital outlay, from 6.4 in the previous year to 4.5 in the current year, signifies a clear move toward more prudent and high-quality spending. Enhanced tax compliance increased corporate profitability, and a general uptick in economic activity all contributed to this upswing in capital expenditure.

Despite the challenges posed by the global pandemic, India's economic resilience shone through, with merchandise exports growing by 8.39% year-on-year and service exports by an impressive 29.82% up to April 2023. Port congestion issues are being resolved, and supply networks are gradually returning to normal. The impact of these positive developments is already evident in the reduction of the Consumer Price Index for Combined (CPI-C) inflation, which decreased from 7.01% in June 2022 to 4.81% in June 2023 (Provisional). A combination of proactive government actions, a flexible monetary policy, and the easing of

global commodity prices and supply chain disruptions suggests a diminishing trend in inflationary pressures throughout India.

INDIAN INFRASTRUCTURE SECTOR

India's trajectory towards robust growth in 2023 and beyond hinges significantly on substantial advancements in crucial sectors, with a pivotal role played by the development of infrastructure. Infrastructure serves as a key facilitator in propelling India toward achieving a formidable US \$26 trillion economy. The Indian economy's main growth engine is the infrastructure sector. The Government of India (GoI) gives highest priority on its development to guarantee the country's overall development. Investments directed towards constructing and enhancing physical infrastructure, particularly in harmony with initiatives promoting the ease of conducting business, stand as a critical factor for boosting efficiency and cost-effectiveness. Prime Minister Narendra Modi has recently underscored the indispensable nature of infrastructure as a pillar for ensuring effective governance across sectors.

The government's unwavering commitment to shaping the future of infrastructure is evidenced by a series of recent initiatives. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, is at the forefront of ushering in systematic and effective reforms in the sector, having already made significant strides. Initiatives like the "Smart Cities Mission" and "Housing for All" have been beneficiaries of these infrastructure-focused endeavors. Saudi Arabia, in turn, aims to allocate substantial investments of up to US\$ 100 billion in India across sectors such as energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

The infrastructure sector stands as a cornerstone for the Indian economy, playing a pivotal role in steering overall development. The government is steadfastly focused on implementing policies ensuring the timely creation of world-class infrastructure, encompassing power, bridges, dams, roads, and urban development. In essence, the infrastructure sector acts as a catalyst for India's economic growth, propelling allied sectors like townships, housing, built-up infrastructure, and construction projects.

Meeting India's ambitious goal of achieving a US\$ 5 trillion economy by 2025 necessitates a heightened emphasis on infrastructure development. The government has initiated the National Infrastructure Pipeline (NIP) alongside other endeavors such as 'Make in India' and the production-linked incentives (PLI) scheme, all geared towards augmenting the growth of the infrastructure sector. While historically, over 80% of the country's infrastructure spending has been directed towards transportation, electricity, and water & irrigation, there is a discernible shift towards addressing other evolving sectors, reflecting changes in India's environment and demographics.

MARKET SIZE

In the fiscal year 2023-24 budget, there's a substantial 33% increase in the capital investment outlay for infrastructure, reaching Rs. 10 lakh crore (US\$ 122 billion), equivalent to 3.3% of the GDP. Notably, the Railways receive a record capital outlay of Rs. 2.40 lakh crore (US\$ 29 billion), about nine times the outlay in 2013-14.

The National Infrastructure Pipeline (NIP) began with 6,835 projects and now encompasses 9,142 projects across 34 sub-sectors. In this initiative, 2,476 projects are in the development phase with an estimated investment of US\$ 1.9 trillion. Almost half of these projects are in the transportation sector, with 3,906 focusing on roads and bridges. The Indian Railways anticipates total revenue from traffic to reach Rs. 2,64,600 crore (US\$ 32.17 billion) for FY24.

The logistics market in India is projected to reach US\$ 410.75 billion in 2022, with an expected increase to US\$ 556.97 billion by 2027, growing at a CAGR of 6.28%. India aims to improve its Logistics Performance Index ranking to 25 and reduce logistics costs from 14% to 8% of GDP within the next five years, amounting to a 40% reduction.

In December 2022, the Airport Authority of India (AAI) and other developers plan a capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in the airport sector over the next five years for expansions, modifications, and other activities.

India presently boasts the world's fifth-largest metro network, expected to surpass advanced economies like Japan and South Korea to become the third largest. The metro rail network spans 810 kms and operates in 20 cities as of September 2022. Mumbai's monorail, at nearly 20 kms, is the third-largest route globally, after China (98 kms) and Japan (28 kms).

Through the 'National Infrastructure Pipeline,' India plans to invest US\$ 1.4 trillion in infrastructure over the next five years. Infrastructure activities accounted for 13% of the total FDI inflows in FY21, amounting to US\$ 81.72 billion. To achieve the vision of 'Housing for All' by 2022, India needs to construct 43,000 houses daily. As of August 22, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh grounded, and 62.21 lakh completed under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).

The upcoming decade requires the development of hundreds of new cities, with a predicted 140% increase in demand for urban freight over the next 10 years. Final-mile freight transit in Indian cities constitutes 50% of the total logistics expenditures in the country's growing e-commerce supply chains. India is anticipated to become the third-largest construction market globally by 2022, with the logistics market estimated to reach US\$ 320 billion by 2025. The overall infrastructure capital expenditure is projected to grow at a CAGR of 11.4% over 2021-26, primarily driven by spending on water supply, transport, and urban infrastructure. During the tenth five-year plan, investment in infrastructure contributed around 5% of the GDP, decreasing to 9% in the eleventh five-year plan. Additionally, India's planning commission proposed a US\$ 1 trillion investment in infrastructure during the 12th five-year plan, with 40% of the funds coming from the private sector.

GOVERNMENT INITIATIVES AND INVESTMENTS

Some of the recent government initiatives and investments in the infrastructure sector are as follows:-

- Infrastructure Finance Secretariat is being established to enhance opportunities for private investment in infrastructure that will assist all stakeholders for more private investment in infrastructure, including railways, roads, urban infrastructure, and power.
- 100 critical transport infrastructure projects, for last and first mile connectivity for ports, coal, steel, fertilizer, and food grains sectors have been identified and will be taken up on priority with investment of Rs. 75,000 crore (US\$ 9 billion), including Rs. 15,000 crore (US\$ 1.8 billion) from private sources.
- An Urban Infrastructure Development Fund (UIDF) will be established through use of priority sector lending shortfall, which will be managed by the National Housing Bank, and will be used by public agencies to create urban infrastructure in Tier 2 and Tier 3 cities.
- The Awas Yojana budget estimate for 2023-'24 constitutes an allocation of Rs. 25,103 crore (US\$ 3 billion) to Pradhan Mantri Awas Yojana-Urban and Rs. 54,487 crore (US\$ 6.5 billion) to Pradhan Mantri Awas Yojana-Gramin.

- The government announced Rs. 305,984 crore (US\$ 42 billion) over the next five years for a revamped, reforms-based, and result-linked new power distribution sector scheme.

ROAD AHEAD

India is on a trajectory to achieve its ambitious economic growth target of reaching US\$ 5 trillion by 2025, but this goal necessitates a substantial improvement in the country's infrastructure. To accommodate the growth in population and economic activities, there is a crucial need for enhanced transportation infrastructure, including investments in roads, railways, aviation, shipping, and inland waterways.

The government is actively advocating for a \$750 billion investment to fortify railway infrastructure and has introduced the Maritime India Vision 2030, envisioning substantial investments in world-class infrastructure at Indian ports.

Global investments and collaborations, such as the India-Japan forum for development in the Northeast, signal a growing interest in supporting India's infrastructure growth. These initiatives align with India's pursuit of self-reliance in future-ready and sustainable critical infrastructure.

Estimates suggest that India should invest \$840 billion in urban infrastructure over the next 15 years to cater to the needs of its rapidly growing population. To ensure the rationality and sustainability of this investment, there must be a simultaneous focus on the long-term maintenance and strength of buildings, bridges, ports, and airports.

The residential sector is experiencing robust sales, with launches indicating a positive trend in 2022. Total sales in the top-7 cities were projected to exceed 360,000 units in 2022.

The Civil Aviation Ministry's "Vision 2040" outlines plans for 190-200 functioning airports in India by 2040, with Delhi and Mumbai each having three international airports. Additionally, the UDAN initiative aims to complete 220 destinations by 2026, providing air connectivity to previously unconnected areas.

The Gati Shakti masterplan outlines 102 critical projects worth \$7.67 billion, set to be completed by 2024, making 2023 a pivotal year for effective execution and timely completion.

The Government of India is placing unprecedented focus on the infrastructure sector, with plans to invest US\$ 1.4 trillion during 2019-23 for sustainable development. There is a proposed investment of Rs. 5,000,000 crore (US\$ 750 billion) for railway infrastructure from 2018-30. Projections indicate India's GDP is expected to grow at 8% over the next three fiscal years, making it one of the fastest-growing economies. Collaborations with Japan, such as the India-Japan Coordination Forum for the development of Northeast, underscore the commitment to strategic infrastructure projects. As a developing nation, India is poised to leverage opportunities for infrastructure expansion, indicating a promising future for the sector.

ROADS AND HIGHWAYS INFRASTRUCTURE

The forecast for the roads and highways market in India indicates a remarkable Compound Annual Growth Rate (CAGR) of 36.16% from 2016 to 2025. This projection is attributed to the government's increasing initiatives to enhance the transportation infrastructure across the country.

Innovations and exceptional performance characterize India's highways sector. The government has successfully introduced over 60 road projects, surpassing a value of \$10 billion, employing the Hybrid Annuity Model (HAM). The HAM approach has effectively balanced risk distribution between private and public partners, fostering increased Public-Private Partnership (PPP) engagement in the sector.

The National Highways Authority of India (NHAI) has adopted asset recycling through the toll-operate-transfer (ToT) model for 100 highways. Notably, the first two bundles, each comprising nine highways, were successfully monetized, attracting investments exceeding \$2 billion.

NHAI has set a Guinness World Record by constructing a continuous 75 km Single Lane Bituminous Concrete Road in an impressive time of 105 hours and 33 minutes, connecting Amravati and Akola on NH 53 in Maharashtra.

In another achievement, NHAI, in collaboration with Maha Metro, secured a Guinness World Record for constructing the longest Double Decker Viaduct (3.14 km) featuring a Highway Flyover and Metro Rail, all supported on a single column, situated between three metro stations in Nagpur.

A significant milestone in the road transportation industry is the NHAI's comprehensive digital transformation. The authority has embraced a fully digital approach, introducing a unique cloud-based and Artificial Intelligence-powered Big Data Analytics platform known as Data Lake, alongside a Project Management Software. This transformation involves shifting the entire project management workflow from manual to online portal-based operations. This includes configuring project execution operations, timelines, and an alert mechanism. All project-related documentation, contractual decisions, and approvals are now exclusively processed through the online portal.

Gati-Shakti National Master Plan

The PM Gati Shakti National Master Plan (NMP) was launched in October 2021 with a vision to enable a mechanism for coordinated planning and to provide a bird's eye view of planned development to all the Ministries for holistic and integrated development. PM Gati Shakti NMP envisages the creation of a system for inter-connected and multimodal transportation networks leading to integrated economic and infrastructure development, improved trade competitiveness, promotion of exports and employment generation. It envisages establishing integration and synergy amongst different infrastructure sector projects such as National Highways, Railways, Waterways, Telecom, etc., catering to development requirements/ logistic supports of different sectors and industries (e.g. Steel, Power, Fertilizers, Coal, etc.). The NMP will rely on creation of various data layers including geographical features, land records, etc., to facilitate coordinated

and integrated planning, project preparations and implementations, optimization of logistics arrangements and efficient transportation systems.

It provides the overall framework for planning, sanctioning and execution of projects. There are no separate funds allocated under PM Gati Shakti NMP. National Monetisation Pipeline

Union Budget 2021-22 has identified monetisation of operating public infrastructure assets as a key means for sustainable infrastructure financing. Towards this, the Budget provided for preparation of a ‘National Monetisation Pipeline (NMP)’ of potential brownfield infrastructure assets. NMP aims to provide a medium term roadmap of the programme for public asset owners; along with visibility on potential assets to private sector.

The aggregate asset pipeline under NMP over the four-year period, FY 2022-2025, is indicatively valued at Rs 6.0 lakh crore. The estimated value corresponds to ~14% of the proposed outlay for Centre under NIP (Rs 43 lakh crore). This includes more than 12 line ministries and more than 20 asset classes. The sectors included are roads, ports, airports, railways, warehousing, gas & product pipeline, power generation and transmission, mining, telecom, stadium, hospitality and housing. The top 5 sectors (by estimated value) capture ~83% of the aggregate pipeline value. These top 5 sectors include: Roads (27%) followed by Railways (25%), Power (15%), oil & gas pipelines (8%) and Telecom (6%). In terms of annual phasing by value, 15% of assets with an indicative value of Rs 0.88 lakh crore are envisaged to be rolled out in the current financial year (FY 2021-22). However, the aggregate as well as year on year value under NMP is only an indicative value with the actual realization for public assets depending on the timing, transaction structuring, investor interest etc.

Our contract acquisition involves a competitive bidding process. Potential projects are identified through client advertisements in national newspapers and websites. The tender department reviews these opportunities, considering factors like project location, complexity, workload, cost estimates, and competitive advantage. The management's approval is sought before submitting bids. We have a dedicated tender department responsible for bidding, ensuring eligibility criteria are met. If needed, joint ventures are formed for eligibility. Prequalification involves detailed organizational, financial, and project portfolio submissions. Clients prequalify contractors based on experience, technical ability, safety records, and financial strength. Price competitiveness remains a crucial criterion. Financial bids require an in-depth study of project conditions, site visits, local market surveys, and quotations from vendors. The bid price is determined by marking up the estimate based on overheads, expenditure, and profitability benchmarks. Post-qualification tenders follow a similar process, with the authority evaluating technical bids first and subsequently opening financial bids for qualified bidders.

HIGHWAYS RELATED LAWS

NATIONAL HIGHWAYS ACT, 1956

The Central Government is responsible for the development and maintenance of ‘National Highways’ and may delegate any function relating to development of ‘National Highways’ to the relevant state government in whose jurisdiction the ‘National Highway’ falls, or to any officer or authority subordinate to the central or the concerned state government. The Central Government may also enter into an agreement with any person (being, either an individual, a partnership firm, a company, a joint venture, a consortium or any other form of legal entity, Indian or foreign, capable of financing from own resources or funds raised from financial institutions, banks or open market) in relation to the development and maintenance of the whole or any part of a ‘National Highway’. Such agreement may provide for designing and building a project and operating and maintaining it, collecting fees from users during an agreed period, which period together with construction period is usually referred to as the ‘concession period’. Upon expiry of the ‘concession period’, the right of the person to collect fees and his obligation to operate and maintain the project ceases and the facility stands transferred to the central government.

Under the National Highways Act, 1956 (the “NH Act”), the Central Government is vested with the power to declare a highway as a national highway and also to acquire land for this purpose. The Central Government may, by notification, declare its intention to acquire any land when it is satisfied that for a public purpose such land is required to be acquired for the building, maintenance, management or operation of a national highway or part thereof. The NH Act prescribes the procedure for such land acquisition which inter alia includes entering and inspecting such land, hearing of objections, declaration of acquisition and the mode of taking possession. The NH Act also provides for payment of compensation to owners and any other person whose right of enjoyment in that land has been affected.

NATIONAL HIGHWAYS FEE (DETERMINATION OF RATES AND COLLECTION) RULES, 2008

The National Highways Fee (Determination of Rates and Collection) Rules, 2008 (the “NH Fee Rules”) regulate the collection of fee for the use of a national highway. Pursuant to the NH Fee Rules, Central

Government may, by a notification, levy fee for use of any section of a national highway, permanent bridge, bypass or tunnel forming part of a national highway, as the case may be. However, the Central Government may, by notification, exempt any section of a national highway, permanent bridge, bypass or tunnel constructed through a public funded project from levy of fees. The NH Fee Rules do not apply to the concession agreements executed or bids invited prior to the publication of such rules i.e. December 5, 2008. The collection of fee in case of a public funded project shall commence within 45 days from the date of completion of the project. In case of a private investment project, the collection of such fee shall be made in accordance with the terms of the agreement entered into by the concessionaire. The NH Fee Rules further provide for the base rate of fees applicable for the use of a section of the national highway, permanent bridge, bypass or tunnel, as the case may be, for different categories of vehicles.

NATIONAL HIGHWAYS AUTHORITY OF INDIA ACT, 1988

The National Highways Authority of India Act, 1988 (the “NHAI Act”) provides for the constitution of an authority for the development, maintenance and management of National Highways. Pursuant to the same, the National Highways Authority of India (“NHAI”), was constituted as an autonomous body in 1989 and operationalised in 1995. Under the NHAI Act, Central Government carries out development and maintenance of the national highways system, through NHAI. The NHAI has the power to enter into and perform any contract necessary for the discharge of its functions under the NHAI Act. The NHAI Act prescribes a limit in relation to the value of the contracts that may be entered into by NHAI. However, the NHAI may enter into contracts exceeding the value so specified, on obtaining prior approval of the Central Government. NHAI Act provides that the contracts for acquisition, sale or lease of immovable property on behalf of the NHAI cannot exceed a term of 30 years unless previously approved by the Central Government.

NATIONAL HIGHWAYS DEVELOPMENT PROJECT

The Government of India, under the Central Road Fund Act, 2000 created a dedicated fund for NHDP (the “Fund”). Certain sources for financing of NHDP are through securitization of cess as well as involving the private sector and encouraging Public Private Partnership (PPP). The NHDP is also being financed through long-term external loans from the World Bank, the ADB and the JBIC as well as through tolling of roads.

Private participation in NHDP

In an effort to attract private sector participation in the NHDP, the NHAI has formulated model concession agreements where a private entity (the “Concessionaire”) is awarded a concession to build, operate and collect toll on a road for a specified period of time, which is usually up to 30 years. The bidding for the projects takes place in two stages as per the process provided below:

- in the pre-qualification stage, NHAI selects certain bidders on the basis of technical and financial expertise, prior experience in implementing similar projects and previous track record; and
- in the second stage, NHAI invites commercial bids from the pre-qualified bidders on the basis of which the right to develop the project is awarded.

In a BOT project, the Concessionaire meets the up-front cost and expenditure on annual maintenance and recovers the entire cost along with the interest from toll collections during the concession period. To increase the viability of the projects, a capital grant is provided by the NHAI / GoI on a case to case basis. The

Concessionaire at the end of the concession period transfers the road back to the Government. The Concessionaire's investment in the road is recovered directly through user fees by way of tolls. In annuity projects, the private entity is required to meet the entire upfront cost (no grant is paid by NHAI / GoI) and the expenditure on annual maintenance. The Concessionaire recovers the entire investment and predetermined return on investments through annuity payments by NHAI / GoI. In hybrid annuity projects, 40% of the total project cost is to be funded by the government and the remaining by the Concessionaire. The NHAI also forms SPVs for funding road projects. This method of private participation involves very less cash support from the NHAI in the form of equity / debt. Most of the funds come from ports/financial institutions/beneficiary organisations in the form of equity / debt. The amount spent on developments of roads/highways is to be recovered in the prescribed concession period by way of collection of toll fee by the SPV. Tax incentives which are being provided to the private entity are eligible for 100% exemption for any consecutive 10 years out of the first 20 years after completion of a project. The Government has also allowed duty free import of specified modern high-capacity equipment for highway construction.

CONTROL OF NATIONAL HIGHWAYS (LAND AND TRAFFIC) ACT, 2002

The Control of National Highways (Land and Traffic) Act, 2002 (the "Control of NH Act") provides for control of land within national highways, right of way and traffic moving on national highways and also for removal of unauthorised occupation thereon. In accordance with the provisions of the Control of NH Act, the Central Government has established Highway Administrations. Under the Control of NH Act, all land that forms part of a highway which vests in the Central Government, or that which does not already vest in the Central Government but has been acquired for the purpose of highways shall be deemed to be the property of the Central Government. The Control of NH Act prohibits any person from occupying any highway land or discharging any material through on such land without the permission of the Highway Administration. The Control of NH Act permits the grant of lease and license for use of highway land for temporary use.

INDIAN TOLLS ACT, 1851

Pursuant to the Indian Tolls Act, 1851, (the "Tolls Act") the State Governments have been vested with the power to levy tolls at such rates as they deem fit, to be levied upon any road or bridge, made or repaired at the expense of the Central or any state government. The tolls levied under the Tolls Act, are deemed to be 'public revenue'. The collection of tolls can be placed under any person as the state governments deem fit under the Tolls Act, and they are enjoined with the same responsibilities as if they were employed in the collection of land revenue. Further, all police officers are bound to assist the toll collectors in the implementation of the Tolls Act. The Tolls Act further gives power for recovery of toll and exempts certain category of people from payment of toll.

PROVISIONS UNDER THE CONSTITUTION OF INDIA AND OTHER LEGISLATIONS ON COLLECTION OF TOLL

Entry 59, List II of Schedule VII read with Article 246 of the Constitution of India vests the States with the power to levy tolls. Pursuant to the Indian Tolls Act, 1851, the State Governments have been vested with the power to levy tolls at such rates as they deem fit.

OTHER LEGISLATIONS RELEVANT TO THE ROAD SECTOR

In addition to the above, there are also certain other legislations that are relevant to the road sector which include the Road Transport Corporation Act, 1950, National Highways Rules, 1957, National Highways (Temporary Bridges) Rules, 1964, National Highways (Fees for the Use of National Highways Section and Permanent Bridge Public Funded Project) Rules, 1997, National Highways (Rate of Fee) Rules, 1997, National Highways Tribunal (Procedure) Rules, 2003, Central Road and Infrastructure Act, 2000, Central Road Fund (State Roads) Rules 2007 and Green Highways (Plantation, Transplantation, Beautification & Maintenance) Policy, 2015.

STATEMENT OF PROVISION FOR GRATUITY AS RESTATED

Gratuity - The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Interest cost: It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

Current Service Cost: is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period.

Actuarial Gain or Loss: occurs when the experience of the Plan differs from that anticipated from the actuarial assumptions. It could also occur due to changes made in the actuarial assumptions.

STATEMENT OF PROVISION FOR GRATUITY AS RESTATED

ANNEXURE-36

Gratuity - The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Interest cost: It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

Current Service Cost: is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period. Actuarial Gain or Loss: occurs when the experience of the Plan differs from that anticipated from the actuarial assumptions. It could also occur due to changes made in the actuarial assumptions.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. **Phase I:** This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual applicant, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b. **Phase II:** This phase commenced on completion of Phase I i.e. with effect from July 01, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
- c. **Phase III:** The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The Issue will be made under UPI Phase II of the UPI Circulars. The Issue will be made under UPI Phase II or III of the UPI Circulars depending upon applicable provision of relevant SEBI Circular at the time of issue Opening.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs

being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 05, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 01, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
