1. ***We depend on the success of our relationships with our customers. We derive a significant part of our revenue from our major customers and we do not have long term contracts with these customers. If one or more of such customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

Our top ten customers have contributed 91.43%, 97.87% and 98.45% of our revenues for the year ended March 31, 2025, March 31, 2024 and March 31, 2023 respectively based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Details of our top customers are as follows:

The percentage of income derived from our top customers during the fiscal 2025, 2024 and 2023 is given below:

Sr. No.	Particulars	For the year ending March 31,

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customer's supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers -decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows and financial conditions.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and that they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

2. ***We are highly dependent on our suppliers for uninterrupted supply of raw-materials. We have not entered into any long-term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non-availability of these raw materials may have an adverse impact in our business prospects, results of operations and financial condition.***

We are highly dependent on S.S. Rods, S.S. Sheets, S.S. Coil and S.S. Patta Patti, stainless steel and other hardware items which are the prime raw material for our products. We procure our supply of raw materials from various vendors from local market. We have not entered into any long-term supply agreement for supply of major raw materials.

Currently, we have been able to secure timely supply of required raw material for our existing activity. Raw materials are easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material. In case of any disruption in supply of raw materials from these suppliers or our procurement of raw materials in terms are not favorable to us; it will adversely affect our operations and financial cost. Further in case our Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices, the performance of our company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition. Moreover, we are dependent upon third parties for supply of our raw materials and any disruption in their supply could disrupt our business and adversely affect our financial results.

3. ***Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.***

Our company's manufacturing unit is based in Gujarat, specifically in the district of Rajkot. Due to our processing unit is concentrated in this region, we are vulnerable to local, regional, and environmental factors including social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events. These disruptions could lead to damage or destruction of our processing capabilities, significant transport delays for our products and raw materials, loss of key personnel, and other adverse effects on our business, financial condition, and operations. Additionally, a significant portion of our sales come from customers in Gujarat State. This geographical concentration increases

our exposure to competition and potential adverse economic and demographic changes in the region, which could affect our business, financial condition, and operations.

As we expand into new markets and geographical areas, we may face competition from national and local players with established local presences and stronger relationships with local customers, government authorities, and suppliers. This could put us at a competitive disadvantage. While we believe we have the necessary expertise and vision to expand into other markets, investors should consider the risks, losses, and challenges we face and should not rely solely on our past performance as an indication of our future performance.

4. Our Company has reported certain negative cash flows from its operating and investing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its operating, investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For the year ending March 31,		
	2025	2024	2023
Net cash flow from Operating activities	262.04	(51.51)	(71.25)
Net cash flow from Investing activities	(320.43)	(228.08)	(45.81)
Net cash flow from Financial activities	34.96	302.93	57.53

For details, please refer “*Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company*” on page no. 194 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

5. The intellectual Property Rights used by our company are “objected” and are not registered in the name of our company. Any failure to protect our intellectual property rights may adversely affect our business.

As on the date of the Draft Prospectus, the company is using the label bearing certificate No. 1383468 since incorporation, whose rightful owner is Mr. Hiteshbhai Mansukhbhai Bhuva however, the said trademark has been assigned by him in the name of the company with all the exclusive rights and without any consideration. In case of expiry/ non- renewal/ cancellation/ breach of the agreements and any changes in the terms of the agreements, we may face damages which could impact the company’s business operations or projected revenue.

Our Company has applied for the registration of the label bearing no. 6193057 as the Trademark Application is under the process of registration and is open for objection on relative grounds of refusal under Section 11 of the Act because the same/similar trademark(s) is/are already on record of the register for the same or similar goods/services. “The objection is raised under S 11 (1) of the Trademarks Act, 1999, as the mark is identical with or similar to earlier marks in respect of identical or similar description of goods or services and because of such identity or similarity there exists a likelihood of confusion on the part of the public.” Further, Infringement of third-party intellectual property rights or failure to protect our own intellectual property can have negative consequences.

In addition, infringement claims can damage our reputation and discourage potential investors, partners, or customers. Additionally, if we fail to protect our own intellectual property, our competitors or other third parties may copy, steal, or misuse our ideas, products, or services. This can lead to lost revenues, decreased market share, or erosion of our competitive advantage. Moreover, any unauthorized use, reproduction, or distribution of our copyrighted material without our permission will result in legal action and may lead to financial penalties, damage

to our brand reputation. It is essential for us to protect our copyrighted material and ensure that it is used only with our permission, to avoid any negative impact on our business operations. Defending our intellectual property rights can be expensive and time consuming, and we may not be able to prevent others from infringing or challenging our rights.

6. ***We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders 100% of the Plant & Machinery, as specified in the Objects of the Offer chapter. Any delay in procurement of such Plant & Machinery may delay the schedule of implementation and may also lead to increase in cost of these Plant & Machinery, further affecting our revenue and profitability.***

Although we have identified the installation of Plant & Machinery required. However, we are yet to place orders for 100% installation of Plant & Machinery worth Rs. 750.00 Lakhs as detailed in the “Objects of the Offer” beginning on page 76 of this Draft Prospectus. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the Offer and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed expansion and can also compel us to buy the same at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

7. ***We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.***

We are engaged in manufacturing and fabrication of various steel- based hardware products which are meant for its application in various sectors such as housing, infrastructure, agriculture, automotive, power, cement, mining, solar power and engineering. We manufacture various hardware products like door kits, cut & butt hinges, parliament hinges, W, Z & duck hinges, gate hook etc. Further our Product Portfolio includes all types of aldrop, latch, handle, tower bolt, shelf bottom etc. Moreover, we are also engaged in trading of products such as door stopper, magnet, table bracket, bed lifter, bell magnet etc. Our company business needs substantial working capital and financing in the form of fund and non-fund based working capital facilities to meet its requirements.

In many cases, a significant amount of our working capital is required to finance day-to-day operations, such as purchasing inventory, managing accounts payable and receivable, and meeting other short-term financial obligations. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our working capital requirements may increase if the payment terms in our agreements include reduced advance payments or longer payment schedules. These factors may result in increases in the amount of our receivables and may result in increases in any future short-term borrowings.

Our sources of additional financing, required to meet our working capital needs, may include the incurrence of debt, the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, which may have a significant effect on our profitability and cash flows. We may also become subject to additional covenants, which could limit our ability to access cash flows from operations and undertake certain types of transactions.

Our business is working capital intensive. A significant portion of our working capital is utilized towards inventories, trade receivables and trade payables. A brief summary of our working capital position based on our Restated Financials is given below:-

8. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm’s length basis, we cannot assure you that we might have obtained more favorable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer *“Annexure 27 – Related Party Transactions”* on page no. 183 of this Draft Prospectus.

9. *The demand and pricing in the steel and steel products industry is volatile and is sensitive to the cyclical nature of the industries it serves.*

Steel prices fluctuate based on a number of factors, such as, the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, international production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various

social and political factors, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as, the infrastructure, construction, automotive and machinery industries. When downturns occur in these economies or sectors, we may experience decreased demand for our products, which may lead to a decrease in steel and steel product prices, which may, in turn, have a material adverse effect on our business, results of operations, financial condition and prospects.

Low steel prices adversely affect the businesses and results of operations of steel product producers generally, including ours, resulting in lower revenue and margins and write-downs of products and raw material inventories. In addition, the volatility, length and nature of business cycles affecting the steel and steel products industry have become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects. In addition, substantial decreases in steel and steel product prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will require a broad economic recovery, in order to underpin an increase in real demand for steel and steel products by end users.

10. Our Company has availed unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our financial condition.

As on March 31, 2025, Our Company has, as per the restated Financial Information, availed total sum of ₹ 132.15 Lakh unsecured loan from Directors which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at unviable terms resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of fund. Any demand for the repayment of such unsecured loan, may affect our cash flow and financial condition.

11. The average cost of acquisition of Equity Shares by our Promoters and the Selling Shareholders could be lower than the price determined at time of registering the Draft Prospectus.

Our Promoters and the Selling Shareholders average cost of acquisition of Equity Shares in our Company may be lower than the Price as may be decided by the Company and the Selling Shareholders in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer chapter title **“SUMMARY OF THE OFFER DOCUMENT”** beginning on page 16 of this Draft Prospectus.

NAME OF THE SELLING SHAREHOLDERS	TYPE	NUMBER OF EQUITY SHARES OFFERED/ AMOUNT	WEIGHTED AVERAGE COST OF ACQUISITION ON FULLY DILUTED BASIS (IN ₹ PER EQUITY SHARE)
Mrs. Pushpaben Mansukhbhai Bhuva	Promoter and Selling Shareholder	Up to 1,11,500 Equity Shares of face value ₹ 10 each aggregating Rs [●] Lakhs.	20.00

12. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material

adverse impact on our business, results of operations and financial condition.

13. *We have not commissioned an industry report for the disclosures made in the section titled ‘Industry Overview’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled “**Industry Overview**” beginning on page 95 of this Draft Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. These facts and statistics included in “**Summary of our Industry**” and “**Industry Overview**” on pages no.16 and 95 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Prospectus. Further, the industry data mentioned in this Draft Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

14. *Our success significantly depends upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract, hire, train and retain key managerial personnel may adversely affect the operations of our Company.*

Our Company is promoted by a group of individuals of 6. The success of our business operations is attributable to our Promoters, Directors and key management personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We believe that the inputs and experience of our promoters are factors for the growth and development of our business and the strategic direction taken by our Company. We benefit from our relationship with our Promoters and Key Managerial Persons and our success depends upon their continuing services, who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business.

Our Directors have built relations with clients and other persons are connected with us. Our success is substantially dependent on the expertise and services of our Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

15. *Improper handling of machineries could result in accidents and may lead to loss of life and may have an impact on the image of our business which could have an adverse effect on our net sales, profitability and results of our operations.*

Improper handling of machines used in the business line of the Company can result into accidents at times and may lead to loss of life of the employees and the Company could face liabilities that may adversely affect its profits. Our Company has been executing the variety of products using various machineries & equipment. Our Company has insured policies cover and has undertaken adequate safety measures, which have minimized the loss of three crucial M’s viz. men, material and machines. Also, our company employs skilled manpower to handle materials and machines and provide requisite in-house training for the same. In spite of the same, in future due to improper handling of machineries which could result in accidents, it could have an adverse effect on our net sales, profitability and results of our operations.

16. *Our Company is dependent on the continuing operation of our manufacturing facilities. Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition.*

Our Company manufactures substantially all of the products at our manufacturing facility located at Rajkot, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, industrial accidents, power interruptions our inability to respond to technological advances and emerging industry standards and practices in the industry and the need to comply with the directives of relevant government authorities. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project.

Our manufacturing facility requires a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. Our Company depends on Paschim Gujarat Vij Co. Ltd. for supply of our energy requirements. For further information, see **“Our Business”** on page no. 107 of the Draft Prospectus.

17. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

Our business, manufacturing facilities, plant and machinery and other assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

18. *The Objects of the Offer for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled as “Objects of the Offer”.*

The fund requirement and deployment, as mentioned in the chapter titled as **“Objects of the Offer”** on page 76 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled **“Objects of the Offer”** on page 76 of this Draft Prospectus is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled **“Objects of the Offer”** will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

19. *Any reduction in the demand for our products could lead to underutilization of our manufacturing capacity. We may also face surplus production of a particular product due to various reasons including inaccurate forecasting of customer requirements, which could adversely affect our business, results of operations, financial condition and cash flows.*

We face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production (thereby delaying delivery of products manufactured by us) by customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity.

Further, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand for their products (which are in turn manufactured by us) could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. Any such underutilization of our manufacturing facility could adversely affect our business, results of operations, financial

condition and cash flows.

20. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operation.*

Our Company requires certain statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition.

Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Our Company requires the following statutory and regulatory registrations, licenses, permits and approvals for our business but the same have not been obtained/not renewed by us, as on date of this Draft Prospectus.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. If we fail to comply with all the regulations applicable to us or if the regulations governing our business or their manner of implementation change, we may incur increased costs, or be subject to penalties or may suffer a disruption in our business activities, any of which, could adversely affect our business or results of operations. For further details, please see "**Key Industry Regulations and Policies**" and "**Government and Other Statutory Approvals**" beginning on page no 122 and 212 respectively of this Draft Prospectus.

21. *We face competition in our business from both organized and unorganized sector. Such competition may have a negative impact on our business prospects, future performance and financial condition.*

The industry, in which we are operating, is increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our goods transportation business, including the following:

- ✓ competition with other companies offering better pricing for the goods manufactured, some of which may have a wider range of product portfolio, and may have greater capital resources than we do;
- ✓ solicitation by customers of bids from multiple manufacturers and the resulting depression of the bidding prices or loss of business to competitors;
- ✓ development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the steel and steel products industry;
- ✓ establishment of better relationships by our competitors with their customers; and
- ✓ the small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently offer lower prices than us.

There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business prospects, future performance, financial condition and results of operations.

Our Company's competitors may enjoy potential competitive advantages over us and may successfully attract our customers to their products/ services by matching or exceeding what we offer to our customers, such as:

- ✓ greater name/brand recognition, a longer operating history, wider geographical reach and wider customer base and extensive international operations;
- ✓ engage in price competition, reducing the product pricing;
- ✓ greater financial, technical and other resources.

There can be no assurance that we will have sufficient resources to respond to competitors' investments in geographical and customer network and pricing and promotional programs.

If our Company is unable to effectively compete with other participants, whether on the basis of pricing, product quality, services or otherwise, it might not be able to attract new customers or retain existing customers, and this could adversely affect our business, financial condition and results of operations.

22. *We could be adversely affected due to misconduct or errors of our employees that are difficult to detect and any such incidents could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and damage our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

23. *Our Company will not receive any proceeds from the Offer for Sale.*

The Offer comprises an Offer for Sale by the Selling Shareholders. The Selling Shareholders will receive the entire proceeds from the Offer for Sale (after deducting applicable Offer related expenses) and our Company will not receive any part of the proceeds of the Offer for Sale. For further information, see “*The Offer*” and “*Objects of the Offer*” on pages 42 and 76, respectively.

24. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

25. *In addition to regular remuneration, other benefits and expense reimbursement our Promoters, Directors, key managerial personnel or senior management hold a vested interest in our Company; to the extent of their shareholding and associated dividend entitlements. They also have a stake in transactions involving our company, whether with themselves individually or with our group companies/entities. Our Company in future may enter in related party transactions subject to necessary compliances.*

Our Promoters, Directors, key managerial personnel or senior management are interested in our Company to the extent of their shareholding and associated dividend entitlements thereon in our Company, in addition to regular remuneration or benefits and expenses reimbursement. Our Promoters, Directors, key managerial personnel or senior management are interested in the transactions entered into between our Company and themselves as well as between our Company. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Furthermore, it is likely that we may enter into related party transactions in the future.

Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years and stub period, please refer to the “*Annexure 27 – Related Party Transaction*” under the Chapter titled “*Restated Financial Statements*” beginning on Page No. 183 of this Draft Prospectus.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

26. All of our revenue from operations are generated from India. Any adverse development affecting our operations in India could have an adverse impact on our business, financial condition and results of operations.

We derive 100% of our revenue from operations from India. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial condition and result of operations.

The concentration of our business in manufacturing of open ended yarn, subjects us to various risks, including but not limited to:

Regional slowdown in Industrial activities;

➤ vulnerability to change of policies, laws and regulations or the political and economic environment;

➤ constraint on our ability to diversify across states; and

➤ perception by our potential clients that we are a regional company, which may hamper us from competing or securing orders for large and complex projects at the national level.

Further, factors such as competition, culture, regulatory regimes, business practices and customs, behavior and preferences in the Countries and State where we may plan to expand our operations may differ from India, and our experience in the India may not be applicable to such other Countries. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national player, but also local players who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors/service provider.

We may not be able to leverage our experience in these regions to expand our operations in other parts of India and outside India.

27. Certain delays, discrepancies and Omissions have been detected in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies.

In the past, there have been some instances of delays, discrepancies and Omissions in our statutory records, as well as in records related to the submission of returns to the concerned Registrar of Companies which includes inadvertently filed incorrect information in the forms filed with the Registrar of Companies.

However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors / Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

28. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

The deployment of the funds towards the objects of the Offer is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoter or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

29. Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Offer, which will allow them to exercise significant influence over us and potentially create conflicts of interest.

The current Offer includes fresh issue of Equity Shares. Our Promoter and Promoter Group may beneficially own approximately [●] % of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control

could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

30. *Our inability to manage growth could disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new products portfolio. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, maintaining good relationships with employees for retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

31. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Moreover, we might not sustain historical dividend levels moving forward.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

For details of our Dividend history refer to the Section ***“Dividend Policy”*** on page 158 of the Draft Prospectus. While we have paid dividends in the past, there can be no assurance as to whether we will pay dividends in the future and, if so, the level of such future dividends.

32. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 50 crores. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

33. *The rate of interest for the loans obtained by us from the banks and Financial Institutions is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled ***“Statement of Financial Indebtedness”*** on page no. 205 of this Draft Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

34. *Changes in technology may render our current technologies obsolete or require us to make substantial investments.*

To remain competitive and efficient, modernization and technology upgradation are crucial for reducing costs and increasing output. Our business heavily relies on technology and machinery to deliver quality services. However, there is a risk of our technology and machinery becoming obsolete over time or not being upgraded timely, which can adversely impact our operations and financial condition, leading to a loss of competitive edge in the market. While we believe that we have implemented updated technology, we understand the importance of continuous improvement. We are committed to staying abreast of the latest technological standards and trends to enhance our

capabilities. In the event of a new technology emerging in our industry, we may be required to invest in adopting that technology or upgrading our existing machinery and equipment to remain competitive.

The costs associated with upgrading technology and modernizing machinery are significant, and they can have a substantial impact on our finances and operations. These investments may lead to higher capital expenditures and can temporarily affect our profitability and cash flow. We must carefully assess the potential benefits and returns on such investments to ensure they align with our long-term growth objectives.

Our ability to successfully implement technology upgrades and modernization efforts depends on various factors, including availability of skilled technicians, compatibility of new technology with existing systems, and adequate financial resources. Delays or challenges in adopting new technology can hinder our operational efficiency and competitiveness in the market.

35. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

36. *We have not made any alternate arrangements for financing the ‘Objects of the Offer’. Any shortfall in raising or meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for our working capital requirements as per the Objects of the Offer. Over the period of time, we have met our capital requirements through funding from our internal accruals. Any shortfall in our net cash flows, internal accruals and our inability to raise institutional debt in future would result in us to borrow fund, which may be repayable on demand, which in turn may increase our financial costs, affect our Promoter’s group entity’s liquidity and restrict future funding from them in urgent situations, thus negatively affecting our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer “*Objects of the Offer*” on page no 76 of this Draft Prospectus.

37. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we might have to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. This could have an adverse effect on our profit and reputation.

38. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the “Listed Securities”) in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures (“ASM”) and graded surveillance measures (“GSM”).

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management's attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

39. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

40. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Offer and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Offer Price is not indicative of prices that will prevail in the open market following the Offer. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Offer Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with our future performance;
- Adverse media reports about us or our shareholders;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about the performance of companies engaged in industrial capital goods sector generally;
- Perception in the market about investments in the Industrial sector capital goods;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share. Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

41. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided

under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

42. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

43. *There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

44. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and cash flows. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares or dividend paid thereon.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and cashflows, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, due to the COVID-19 pandemic, the Government of India also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Further, the Government of India has notified the Finance Act, 2025, which has introduced various amendments.

The Government of India has also proposed an alteration to the concessional basic customs duty rate on drugs, medicines, diagnostic kits or equipment and bulk drugs used in the manufacture of drugs and specified goods for use in the pharmaceutical and bio-technology sectors imported for use in research and development. In respect of goods and services tax ("GST"), the Government of India has restricted the availability of input tax credit in certain circumstances, such as where a vendor has been non-compliant with furnishing details of supply made to us or discharging GST. Further, the Finance Act, 2025 has proposed to consider perquisites or benefits arising from business whether convertible into money or not or payable in cash or kind, as taxable income. Such changes may adversely affect our business, results of operations, financial condition and cash flows.

We have not fully determined the effect of these recent and proposed laws and regulations on our business. We cannot predict whether any amendments made pursuant to the Finance Act 2025 would have an adverse effect on our business, results of operations, financial condition and cash flows. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Uncertainty in the applicability, interpretation, or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current businesses or restrict our ability to grow our businesses in the future.

Our Company cannot predict whether any tax laws or other regulations affecting it will be enacted or predict the nature and effect of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business, results of operations, financial condition and cash flows.

45. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

46. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

47. *With time we might be liable to other labor laws which were not applicable before leading to increase cost and time to be invested in its compliance.*

Employees form the integral part of the operation of our business. Any labor disputes or unrests could lead to lost production, increased costs or delays which could lead to penalties. We are subject to a number of stringent labor legislation that protects the interests of workers and defines our duties and obligations towards them in the capacity of principal employers, including legislations that sets forth detailed procedures for employee removal and dispute resolution and impose financial obligations on us. We are also subject to state and local laws and regulations. If labor laws become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, results of operations, financial condition and cash flows. Any organizational changes, including changes in salaries and wages and other employee benefits that are, or are perceived to be negative, could result in an increased attrition rate. We cannot assure you that there may not be incidences of labor unrest and absenteeism from work by some of our employees. Labour shortages could increase the cost of labor and hinder our productivity and ability to adhere to our delivery schedules for our projects, which would materially and adversely affect our business, financial condition, results of operations and prospects.

48. *Our Company is subject to risk arising from changes in interest rates and banking policies.*

Increased interest rates will have a bearing on profitability and credit controls will have an effect on our liquidity and will have serious effects on adequate working capital requirements. We are dependent on various banks for arranging of our working capital requirement etc. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on profitability of our company.

49. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customer. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

50. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

51. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factor Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

52. *Any disproportionate increase in labor costs including increase in wage/salary demand, labor unrest or labor claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labor unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

53. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

54. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Such activities in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

Notes:

(1) Except as stated above, we have considered the above quotations for the budgetary estimate purpose and have not placed orders for them. The actual cost of procurement and actual supplier/dealer may vary.

(2) Quotation received from the vendor mentioned above is valid as on the date of this Draft Prospectus. However, except as stated above, we have not entered into any definitive agreements with any of the vendor and there can be no assurance that the same vendor would be engaged to eventually supply the machineries or at the same costs.

(3) The machinery models and quantity to be purchased are based on the present estimates of our management. The Management shall have the flexibility to revise such estimates (including but not limited to change of vendor or any modification/addition/deletion of machineries) at the time of actual placement of the order. In such case, the Management can utilize the surplus of proceeds, if any, arising at the time of actual placement of the order, to meet the cost of such other machinery, equipment or utilities, as required. Furthermore, if any surplus from the proceeds remains after meeting the total cost of machineries, equipment and utilities for the aforesaid purpose, the same will be used for our general corporate purposes, subject to limit of 15% of the amount raised by our Company through this Fresh Offer or ₹10 crores whichever is lower.

(4) The quotations relied upon by us in arriving at the above cost are valid for a specific period of time and may lapse after the expiry of the said period. Consequent upon which, there could be a possible escalation in the cost of machineries proposed to be acquired by us at the actual time of purchase, resulting in increase in the estimated cost.

2. Full or part repayment and/or prepayment of certain outstanding secured borrowings availed by our Company

Our Company has entered into various financial arrangements from time to time, with banks and financial institutions. The loan facilities availed by our Company include borrowings in the form of, inter alia, term loans and working capital facilities including fund based and non-fund-based borrowings. For details, see section entitled ***“Restated Financial Statements”*** on page 159.

As on July 31, 2025, the total amount outstanding under our loan facilities (comprising of term loans, working capital limits and unsecured loans) was ₹ 461.24 lakhs. We propose to utilise an estimated amount of ₹415.00 lakhs from the Net Proceeds towards full or partial re-payment or pre-payment of borrowings, availed by our Company. The repayment/ prepayment, will help reduce our outstanding indebtedness, assist us in maintaining a favourable debt-equity ratio and enable utilisation of some additional amount from our internal accruals for further investment in business growth and expansion. In addition, we believe that since our debt-equity ratio will improve significantly, it will enable us to raise further resources at competitive rates and additional funds or capital in the future to fund potential business development opportunities and plans to grow and expand our business in the at the next level in upcoming era.

Given the nature of these borrowings and the terms of repayment/prepayment, the aggregate outstanding borrowing amounts may vary from time to. Further, the amounts outstanding under these borrowings as well as the sanctioned limits are dependent on several factors and may vary with our business cycle with multiple

intermediate repayments, drawdowns and enhancement of sanctioned limits. However, the aggregate amount to be utilized from the Net Proceeds towards repayment/ prepayment of certain borrowings, in part or in full, would not exceed ₹415.00 lakhs.

Current Assets		
1	<i>Inventories:</i>	<p>The Company's inventory levels have progressively increased over FY 2023 to FY 2025 in line with business growth, increasing from ₹85.62 lakhs in FY 2023 to ₹715.22 lakhs in FY 2025. Despite the increase in value, inventory turnover has been efficiently managed, with holding periods ranging:</p> <ul style="list-style-type: none"> • Raw Materials: 9 days • Work-in-Progress: 11 to 24 days • Finished Goods: 15 to 30 days <p>For FY 2026, inventory is projected at ₹1,269.85 lakhs, nearly doubling due to anticipated scale-up in operations, broader product offerings, and higher throughput from capacity enhancement. However, the Company has assumed holding periods consistent with prior years (Raw Materials – 9 days, WIP – 20 days, Finished Goods – 26 days).</p>

3	Other current assets including Short term loans and advances	<p>This includes advance payments to suppliers, statutory receivables (e.g., GST), cash and bank balances, and balances with government authorities and other operational assets. The total value increased from ₹22.33 lakhs in FY 2023 to ₹9.74 lakhs in FY 2025, with holding periods reducing from 10 to under 1 day due to improved control.</p> <p>The Company expects to maintain these holding levels at around 5 days in the future.</p>
Current Liabilities		
4	Trade payables	<p>Payables have risen from ₹16.24 lakhs in FY 2023 to ₹365.14 lakhs in FY 2025, with holding periods moving from 8 to 60 days. This reflects better supplier negotiation, improved vendor terms, and increased purchasing power.</p> <p>For FY 2026, trade payables are projected at ₹766.80 lakhs, with a holding period of 44 days, considering:</p> <ul style="list-style-type: none"> • A balance between timely supplier payments and maintaining liquidity • Compliance with the MSME Act, ensuring timely settlement for small suppliers

Sr. No.	Particulars	Assumptions
		<ul style="list-style-type: none"> These shifts are aligned with revenue growth (from ₹477.68 lakhs to ₹2786.29 lakhs) and the company's operational scaling to address market demand and mitigate supply chain disruptions
5	Other current liabilities & Short term provisions	<p>These items include outstanding expenses, statutory dues, and provisions for employee benefits.</p> <p>Other current liabilities include provisions, statutory dues, and expenses payable. GLOBAL ECONOMY

Global growth is projected at 3.0 percent for 2025 and 3.1 percent in 2026. The forecast for 2025 is 0.2 percentage point higher than that in the reference forecast of the April 2025 World Economic Outlook (WEO) and 0.1 percentage point higher for 2026. This reflects stronger-than-expected front-loading in anticipation of higher tariffs; lower average effective US tariff rates than announced in April; an improvement in financial conditions, including due to a weaker US dollar; and fiscal expansion in some major jurisdictions. Global headline inflation is expected to fall to 4.2 percent in 2025 and 3.6 percent in 2026, a path similar to the one projected in April. The overall picture hides notable cross-country differences, with forecasts predicting inflation will remain above target in the United States and be more subdued in other large economies.

Risks to the outlook are tilted to the downside, as they were in the April 2025 WEO. A rebound in effective tariff rates could lead to weaker growth. Elevated uncertainty could start weighing more heavily on activity, also as deadlines for additional tariffs expire without progress on substantial, permanent agreements. Geopolitical tensions could disrupt global supply chains and push commodity prices up. Larger fiscal deficits or increased risk aversion could raise long-term interest rates and tighten global financial conditions. Combined with fragmentation concerns, this could reignite volatility in financial markets. On the upside, global growth could be lifted if trade negotiations lead to a predictable framework and to a decline in tariffs. Policies need to bring confidence, predictability, and sustainability by calming tensions, preserving price and financial stability, restoring fiscal buffers, and implementing much-needed structural reforms.

Since the April 2025 WEO, uncertainty has remained elevated even as effective tariff rates have come down (Figure 1). Most notably, China and the United States on May 12 agreed to lower for 90 days (until August 12) tariffs that had resulted from post-April 2 escalation. The US pause on higher tariffs for most of its trading partners is now set to expire on August 1, pushing back the original deadline of July 9. Letters issued by the US administration in July to some trading partners threaten to impose tariffs even higher than those announced on April 2. Legal proceedings are currently underway in the United States concerning the use of the International Emergency Economic Powers Act as a legal basis for the imposition of tariffs. Although the passage of the One Big Beautiful Bill Act (OBBBA) in July brought clarity to the near-term path of US fiscal policy, it has added to uncertainty about longer-term fiscal sustainability.

Figure 1. Tariffs and Global Uncertainty
(Percent, index, right scale)

Global financial conditions have eased (Box 1). US equity markets have largely rebounded, erasing losses from the April 2 tariff fallout and reaching new heights. Other global equity markets have also rallied, swayed by tariff-related announcements and releases of macroeconomic data that turned out to be better than expected. Notably, the US dollar

has depreciated further, defying expectations that tariffs and larger fiscal deficits would cause the currency to appreciate. Implied paths for policy rates have flattened for advanced economies, while continued dollar weakness has provided some monetary policy space for emerging market and developing economies. Yield curves have steepened in the context of fiscal concerns, although the steepening thus far is not unusual by historical standards despite very high debt and deficit levels in many countries.

With these forces in place, the global economy has continued to hold steady, but the composition of activity points to distortions from tariffs, rather than underlying robustness. Global growth in the first quarter of 2025 was 0.3 percentage point above that predicted in the April WEO. International trade and investment drove activity, while private consumption was more subdued across major jurisdictions. Real GDP decreased in the United States, at an annualized rate of 0.5 percent, marking the first quarterly contraction in three years. Consumer spending rose only by 0.5 percent, but this came after remarkably fast growth of 4.0 percent in the fourth quarter of 2024. Imports and business investment surged—especially in information processing equipment. Taken together, these patterns were consistent with aggressive front-loading by US firms and households ahead of expected higher prices induced by tariffs. In the euro area, GDP accelerated to 2.5 percent, driven by investment and net exports, even as private consumption lost steam. Ireland largely led the spurt, with growth shrinking to 1.4 percent when Ireland is excluded. China’s real GDP growth, at an annualized rate of 6.0 percent, exceeded expectations. This was mainly driven by exports, propped up by a depreciating renminbi closely tracking the dollar and with declining sales to the United States more than offset by strong sales to the rest of the world (Figure 2), and, to a smaller extent, by consumption, supported by fiscal measures. Japan’s economy contracted by an annualized 0.2 percent, as soft private consumption and weak net exports weighed on growth while strong private investment helped cushion the decline. Global trade grew robustly in the first quarter, but high-frequency indicators point to an unwinding of front-loading in the second quarter.

Figure 2. China's Cumulative Export Growth by Destination (Percent)

Global inflation is showing mixed signs. The global median of sequential headline inflation has increased a notch, but core inflation has eased considerably and is now below 2 percent. Several economies, including the euro area, have seen downside surprises. In the United States, inflation has ticked up, with tentative signs of pass-through from tariffs and a weaker dollar to consumer prices in some import-sensitive categories, and intermediate goods costs for producers have risen.

OVERVIEW ON INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for Q2 FY25 is estimated at Rs. 76.60 lakh crore (US\$ 886.16 billion) with growth rate of 8.0%, compared to Rs. 70.90 lakh crore (US\$ 820.22 billion) for Q2 FY24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-December 2024, India’s exports stood at Rs. 27.56 lakh crore (US\$ 318.96 billion), with Engineering Goods (27.32%), Petroleum Products (14.59%) and Electronic Goods (8.19%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP for Q2 of FY25 is estimated at Rs. 44.10 lakh crores (US\$ 509.36 billion) with growth rate of 5.4%, compared to Rs. 41.86 lakh crore (US\$ 484.27 billion) for Q2 of 2023-24. The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crore (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

- India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.
- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- According to a report by the State Bank of India (SBI), domestic investment announcements in India have experienced a substantial increase, exceeding Rs. 37 lakh crore (US\$ 428.04 billion) in FY23 and FY24.
- According to data from the Directorate General of Civil Aviation (DGCA), India's domestic air passenger traffic increased by 6.12% in 2024, reaching a total of 161.3 million passengers. This growth follows a substantial YoY increase of 23.36% in 2023, attributed to the ongoing recovery from the pandemic.

- Between April 2000–September 2024, cumulative FDI equity inflows to India stood at Rs. 89.30 lakh crore (US\$ 1,033.40 billion).
- In November 2024, the overall IIP (Index of Industrial Production) stood at 148.4. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 133.8, 147.4 and 184.1, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 5.22% in December 2024 against 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January - (up to 15th July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

GOVERNMENT INITIATIVES

- Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:
- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.

- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of ‘Aatmanirbhar Bharat’ and ‘Local goes Global’.
- To enhance India’s manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister’s Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and High-Frequency Indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs. 11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India’s is experiencing resilient growth despite the global pandemic. India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023.

With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

MANUFACTURING SECTOR IN INDIA

INTRODUCTION

Manufacturing is emerging as an integral pillar in the country’s economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India’s GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

The HSBC India Manufacturing PMI edged up to 58.2 in April 2025 from 58.1 in March, slightly below the flash estimate of 58.4, marking the strongest sector improvement in ten months.

India has the potential to become a global manufacturing hub for wind power components. India is well-positioned to cater to 10% of the global wind energy demand by 2030, leveraging its manufacturing capacity, technology, and global reputation.

India is rapidly positioning itself as a global manufacturing hub, especially in electronics, fuelled by supportive policies and a skilled workforce. Value addition in electronics has risen from 30% to 70% and is projected to touch 90% by FY27.

India has the potential to produce technology at a lower cost than China if it can efficiently master and manufacture it, stated World Bank Country Director Mr. Auguste Tano Kouame. He emphasised that India's large workforce provides a competitive advantage in the global market.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship. Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity.

Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

STEEL INDUSTRY IN INDIA

INTRODUCTION

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration

to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers, and secondary producers.

India is the world's second-largest producer of crude steel, with an output of 137.96 MT of crude steel and finished steel production of 132.57 MT in FY25.

India's domestic steel demand is estimated to grow by 9-10% in FY25 as per ICRA.

The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

According to a Deloitte report the demand for steel in India is projected to grow significantly over the next decade, with annual growth rates expected to range from 5% to 7.3%.

MARKET SIZE

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In FY25 (April to February), the production of crude steel stood at 137.96 MT.

In FY25 (April to February), the production of finished steel stood at 132.57 MT.

In FY25 (April – February) exports of finished steel stood at 3.60 metric tonnes (MT), while imports stood at 6.07 MT.

In FY25 (April-February), the consumption of finished steel stood at 137.85 MT.

The per-capita consumption of steel stood at 97.7 kgs in FY24.

In FY24, the consumption of finished steel stood at 136 MT.

In FY24, the production of crude steel and finished steel stood at 143.6 MT and 138.5 MT, respectively

In FY24, the consumption of finished steel stood at 135.90 MT.

In FY24, the exports and imports of finished steel stood at 7.49 MT and 8.32 MT, respectively.

The annual production of steel is anticipated to exceed 300 million tonnes by 2030-31. By 2030-31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–1931. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

Our Manufactured Products

- ✓ ***Cutt & Butt Hinges***- These Hinges are made in 28 different dimensions.

A hinge is a movable joint that joins two items having rectangular pieces that fasten to two different parallel parts close one to each other and joining them and enabling swinging motion up to 180°.

A cut & butt hinge's main function is to carry out swinging motions for the opening and closing of doors, gates, shelves, windows and other items. A butt hinge also works as the support for the rotating objects. It is the only thing holding the door-to-door frame.

- ✓ **Railway Hinges**- These Hinges are made in 33 different dimensions.

Railway Hinges are almost similar to the butt hinges, but in differentiation they are quite longer than the butt hinges. It is used on heavy doors, wide doors, other exteriors. The production process of railway hinges does not differ with the butt hinges except the cutting of piece of sheet will be a bit longer than usual.

- ✓ **Parliament Hinges**- These Hinges are made in 8 different dimensions.

Parliament Hinges have a design of a traditional double leaf hinge with a cut out section at the top and bottom. This cut-out part of the hinge is designed to allow the door to by-pass a deep reveal and the door can open out 180 degree and swing flat against a wall. The whole production of parliament hinges is similar to that of the butt hinges except in the process of cutting as removing excess material from the metal workpiece is a way to shape it into a hinge component and after this can be accomplished through sawing, shearing and drilling.

- ✓ **Flower Door Hinges**-These Hinges are made in 4 different dimensions.

Flower door hinges are designed in such a way that the leaves sit flush against each other. This is achieved by fitting one leaf inside the other. This is an advantage against butt hinges since flower door hinges do not need a mortise or a recess on the surface of the body they are attached to. These types of hinges are used in light load applications. Flower door hinges are the main options for bathroom doors and main doors. It is very easy to fit as they can be fastened directly to the door frame and do not require more efforts.

- ✓ **T-Hinges**-These Hinges are made in 8 different dimensions.

T-Hinges are the hinges that are designed to support heavy weight applications. In order to handle and hold greater amount of weights than the typical hinge, T-Hinges are often thicker and made of stronger materials than their average duty counterparts. These are available in a wide variety of sizes, styles and materials. The only difference between T-Hinges and others is their ability function while supporting large amount of weight. Otherwise they look and function like any other hinge.

- ✓ **W, Z & Duck - Hinges**- These Hinges are made in 37 different dimensions.

W and Duck Hinges are mainly used for office furniture's wide door or cabinets, these hinges almost hide after fixing in furniture cabinets. W shape allows to be open and stay at 90 degrees, these hinges are also used for above head cabinets doors which can be open upside down and stay open at 90 degrees.

Z hinges has also the same use especially for wardrobe doors. Once it is fixed in wardrobe door it will not be visible from outside after final finish as a part of interior furniture and modern design of furniture. Z hinges are fixed within the edge of the doors and hide behind the mica.

- ✓ **Aluminium Super Marble Heavy Tower Bolt**-These Bolts are made in 72 different dimensions.

Aluminium Tower Bolt is designed for keeping doors or gates locked. At Spider Locks, we have an impressive array of aluminium tower bolt range highly demanded by the customers, giving a beautiful touch to your laminated fixtures.

- ✓ **Gate Hook**-These Hooks are made in 25 different dimensions.

Gate Hook is a part of gate hinge which is driven into the post and supports the leaf attached to the gate

- ✓ **Door Kit**-These door kits are made in 28 different dimensions.

- ✓ **Screw**-A screw is a metal object similar to a nail, with a raised spiral line around it. These Hinges are made in 38 different dimensions.

MANUFACTURING PROCESS

This process can be divided broadly into the following phases:

- Designing and Prototyping
- Procurement of raw materials
- Cutting and shaping
- Machining & Assembling
- Surface Treatment
- Quality check and packaging

Manufacturing hinges is a complex process that involves several steps to create a functional and durable hinge. The process begins with designing and prototyping, where we plan the hinge on the basis of the type and dimension and develop a prototype for testing and validation.

Once the design has been finalized, we select the materials for the hinge based on the structure and desired properties, such as strength and corrosion resistance. Our raw materials mainly consist of steel, aluminium and brass etc. We have been able to secure timely supply of required raw material for our existing activity. Raw material is easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material.

The next step is cutting, where the raw material is cut to the appropriate size and shape for the hinge using machines such as a laser cutter or water jet cutter. These machines use high-pressure streams of water or laser beams to precisely cut the material to the desired shape and size. It involves removing excess materials from the metal workpiece. This step is crucial to ensure that the materials are correctly flattened, deformed or cut into the hinge component. These machining methods involve casting, deformation, cutting and extrusion.

After cutting, the pieces of material are then shaped into the final form of the hinge using machines such as a press brake or stamping machine. These machines use high pressure to bend and shape the material into the desired format.

Once the hinge has been shaped, holes are drilled into the hinge to attach the hinge to the door and frame using machines such as a drill press or CNC machine. These machines use precision drilling tools to create the holes needed for attaching the hinge.

After drilling, in order to ensure a longer lifespan, aesthetic value and overall design of the hinges, the hinges undergo finishing processes such as polishing, rust-proofing, smoothing and painting. This process is done to improve the decorative appeal and durability of the door hinges and ensure quality assurance.

The next step is assembling of the hinge or any pins or other hardware items needed for the final product. In this process, we also double-check to align the door hinges properly to accommodate all the requirements of the hinge's application. This step requires skilled workers to put all the hinge parts together and ensure they fit correctly.

Post assembling, the hinge is tested for quality control measure to ensure proper operation and compliance with industry standards. This step is critical to ensure that the hinge will function correctly and meet the requisites of the industry standards.

The final step is packaging, where the hinge is packaged for shipping or storage. These products are packed into corrugated cardboard boxes and further into containers for dispatch. These containers are loaded into trucks or light commercial vehicles, trailers, which are unloaded at the point of mode of transportation based on the location of the customer and transported by roadways.

Financial Year 2025 compared to Financial Year 2024

Long-term Borrowings

Long-term borrowings declined from ₹197.44 lakh as of March 31, 2024 to ₹129.57 lakh as of March 31, 2025, reflecting scheduled repayments of term loans during the year. The reduction is in line with the company's objective to progressively deleverage while funding expansion through a balanced mix of internal accruals and working capital facilities.

Short-term Borrowings

Short-term borrowings increased from ₹157.47 lakh at the end of March 31, 2024 to ₹292.32 lakh at the end of March 31, 2025, primarily to meet elevated working capital requirements driven by higher inventory levels and trade receivables in line with the 46% year-on-year revenue growth. These borrowings, mainly in the form of cash credit and other short-term facilities, ensured operational liquidity during a period of sustained business expansion.

Trade Payables

Trade payables rose from ₹327.53 lakh as on March 31, 2024 to ₹365.14 lakh as on March 31, 2025, reflecting increased procurement volumes to support higher production. While the growth is more moderate than the prior year, supplier credit continues to play a key role in funding the working capital cycle. The company remains committed to maintaining strong supplier relationships by balancing negotiated credit terms with timely payments.

Inventories

Inventories grew from ₹436.15 lakh at the close of March 31, 2024 to ₹715.23 lakh at the close of March 31, 2025, driven by higher levels of raw materials, work-in-progress, and finished goods to support increased order volumes and ensure continuity in deliveries. This also includes strategic stocking of key inputs to mitigate supply chain disruptions and price volatility in metals. Management continues to focus on improving inventory turnover while aligning stock levels with demand forecasts.

Trade Receivables

Trade receivables increased from ₹486.29 lakh as on March 31, 2024 to ₹590.71 lakh as on March 31, 2025, consistent with higher sales volumes during the year. The company continues to extend competitive credit terms to customers in line with industry practice while strengthening credit monitoring and collection processes to keep the receivable cycle within targeted limits.

Short-term Loans and Advances

Short-term loans and advances decreased from ₹57.57 lakh at the end of March 31, 2024 to ₹9.74 lakh at the end of March 31, 2025, largely due to the recovery of supplier advances and other operational advances provided in the previous year. This reduction reflects the company's focus on tightening working capital management and minimizing funds locked in non-revenue generating advances.

Financial Year 2024 compared to Financial Year 2023

Long-term Borrowings

Long-term borrowings increased from ₹113.47 lakh as of March 31, 2023 to ₹197.44 lakh as of March 31, 2024, reflecting the drawdown of term loans to finance capacity expansion and acquisition of new plant and machinery during the year. This funding supported the scale-up of operations and is aligned with our long-term growth strategy. The company remains focused on maintaining a balanced capital structure, and repayments are structured to match cash generation from operations.

Short-term Borrowings

Short-term borrowings rose sharply from ₹24.91 lakh at the end of March 31, 2023 to ₹157.47 lakh at the end of March 31, 2024. The increase was driven by higher working capital requirements to support the significant revenue growth achieved during the year, alongside higher inventory and receivable levels. These borrowings, primarily in the form of cash credit and working capital facilities, provided flexibility to meet operational funding needs while ensuring timely delivery to customers.

Trade Payables

Trade payables grew from ₹16.24 lakh as on March 31, 2023 to ₹327.53 lakh as on March 31, 2024, in line with the expansion of procurement volumes to support higher production. The increase also reflects extended credit terms negotiated with suppliers, which helped to partially fund the working capital cycle during a year of rapid scale-up. The company continues to prioritize timely settlement of dues while optimizing supplier credit to manage liquidity efficiently.

Inventories

Inventories increased from ₹85.62 lakh at the close of March 31, 2023 to ₹436.15 lakh at the close of March 31, 2024, driven by higher raw material stocking, work-in-progress, and finished goods to support increased sales volumes and ensure timely order fulfilment. The growth in inventories also reflects strategic stocking of key materials to mitigate supply chain risks and price volatility. The company remains focused on optimizing inventory turnover to balance sales readiness with efficient working capital use.

Trade Receivables

Trade receivables rose substantially from ₹62.66 lakh as on March 31, 2023 to ₹486.29 lakh as on March 31, 2024, in line with the significant increase in sales. The higher receivable balance also reflects extended credit terms to key customers in competitive market conditions. Management is committed to strengthening credit appraisal processes and collection mechanisms to maintain healthy receivable cycles and minimize the risk of overdue accounts.

Short-term Loans and Advances

Short-term loans and advances increased from ₹22.33 lakh at the end of March 31, 2023 to ₹57.57 lakh at the end of March 31, 2024, primarily on account of higher advances to suppliers and other operational advances related to the expanded scale of operations. These advances are closely monitored to ensure timely realization or settlement and to support uninterrupted production and service delivery.

Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash and collateral requirements. We employ prudent liquidity risk management practices which inter-alia means maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables.

We consider our customers to be creditworthy counterparties, which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

Material Frauds

There is no material frauds committed against our Company in the last three financials year.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department for Promotion of Industry and Internal Trade (“DPIIT”).

The Government of India has from time to time made policy pronouncements on Foreign Direct Investments (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

Under the current applicable sectoral cap, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present our Company is in the business of Infrastructure Solutions, Digital Business Solutions and Consulting Solutions. As these sectors/activities are not specifically listed under the FDI Policy 2020, it shall come under the Permitted Sectors category, hence 100 % foreign direct investment through automatic route is permitted subject to applicable laws/regulations, security and other conditionalities.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each applicant should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the applicant shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
