The following factors have been considered for determining the materiality of Risk Factors:

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. ***Increase in the cost of, or a shortfall in the availability of our raw material i.e. yarn could have an adverse effect on our business, results of operations and financial condition.***

The raw material used by us for manufacturing of our products including cotton shirting, cotton suiting, fancy fabric, yarn dyed fabrics and blended fabric of polyester. The price of raw materials have been fluctuating which is evident from the cost of material consumed to revenue ratio as under:

(Rs. In Lakhs)

Particulars	For the Year ended March 31		
	2018	2017	2016
Total Revenue	11,197.82	8,349.74	6,278.38
Cost of Material Consumed	9,181.97	6,481.61	4,997.00
% of total revenue	81.99%	77.62%	79.59%

**On the basis of Restated financial statement.*

The price and availability of raw material depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. The yarns are procured from local suppliers such as dealers, traders and brokers available in Rajasthan as well as from other states like Gujarat, Maharashtra, Punjab, etc. which are cost efficient and easily available. We usually do not enter into long term supply contracts with any of our suppliers and typically place orders with them after firm-orders is received. The absence of long term contracts at fixed prices exposes us to volatility in the prices of material that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure material from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations.

2. ***Our inability to implement our business strategy or effectively sustain and manage our growth could have an adverse effect on our business, results of operations and financial condition.***

In the past five financial years as per restated financials our revenues have continuously increased from Rs. 3,264.01 lakhs in FY 2013-14 to Rs. 3,814.93 lakhs in FY 2014-15 to Rs. 6,278.38 lakhs in FY 2015-16 to Rs. 8,349.74 lakhs in FY 2016-17 and further to Rs. 11,197.82 lakhs in FY 2017-18, showing an increase of 16.88%, 64.57%, 32.99% and 34.11%. Our Net Profit After Tax (PAT) for the above mentioned periods were Rs. 26.01 lakhs, Rs. 27.58 lakhs, Rs. 51.76 lakhs, Rs. 57.35 lakhs and Rs. 293.80 lakhs, respectively, showing an increase of 6.05%, 87.64%, 10.80% and 412.33%. The total revenue of our Company in these 5 financial years has grown at a CAGR of 36.12% and the profit after tax for the same period has grown at a CAGR of 83.33%.

Further, we cannot assure you that our growth strategies will be successful or that we will be able to continue to expand our operations. In order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to select and retain key managerial personnel, maintaining effective risk management policies and training managerial personnel to address emerging challenges.

We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations, or establish or develop business relationships beneficial to future operations. Failure to manage growth effectively could have an adverse effect on our business and results of operations.

3. ***Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 71, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 71 is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and operation position. We cannot assure that the current business plan will be implemented or orders shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The requirement of working capital for the initial public offer has been based on an increased limit of Rs. 2,500 Lakhs planned with HDFC Bank Ltd. We cannot assure that the Bank will definitely increase our working capital limit from currently Rs. 2,000 Lakhs to Rs. 2,500 Lakhs. Further, the deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans.

4. ***Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

Our operations involve extending credit, ranging typically from 4 to 5 months, to our customers. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables.

Details of Trade Receivables for the last three Fiscal Years are asunder:

(Rs. In Lakhs)

Particulars	March 31, 2018	March 31, 2017	March 31, 2016
Trade Receivables	4,050.51	2,665.48	2,049.49
Total revenue	11,197.82	8,349.74	6,278.38
Trade Receivables % of total revenue	36.17	31.92	32.64

**On the basis of Restated Financial statement.*

If our customers delay or default in making these payments, our profits margins and cash flows could be adversely affected.

5. ***Our top ten clients contribute approximately 66.13% of our revenues for the year ended March 31, 2018. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top ten clients contribute approximately 66.13% of our revenues for the year ended March 31, 2018. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective

and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

For further details, please refer to section titled “Our Business” beginning on page 96.

- 6. *Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or under-utilization of our manufacturing facilities could have an adverse effect on our business, results of operations and financial condition.***

Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections and testing, or may shut down certain facilities for capacity expansion and equipment upgrades. We may also face protests from local citizens at our existing facilities or while setting up new facilities, which may delay or halt our operations.

Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or the under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition.

We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain

sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenure. However since all of them belong to promoter group, we do not foresee any such situation. For further details please refer chapter titled “Financial Information” beginning on page 149.

19. A shortage or non-availability of electricity, fuel or water may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.

B. EXTERNAL RISK FACTORS

41. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

43. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realised on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long term capital gains and currently, such gains are not be subject to capital gains tax in India if Securities Transaction tax (STT) has been paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. The Finance Bill, 2018, tabled before the Parliament, proposes to withdraw the exemption on long-term capital gains tax from April 01, 2018 and to impose 10%, tax on such long-term capital gains in excess of Rs. 1,00,000. This proposal is subject to parliamentary process. Any long-term gain realised on the sale of equity shares, which are sold other than on a recognised stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

44. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of -implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period

45. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

46. Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

47. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

48. Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk," may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

49. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

GLOBAL ECONOMIC OVERVIEW

The global economy is witnessing a broad-based revival with the cyclical upswing that started in mid-2016 gaining strength, aided by policy stimulus and characterized by a pickup in investments, growth in international trade and employment gains. This is the strongest synchronized global growth upturn since 2010 with GDP growth in two-thirds of countries collectively contributing 75% of the global GDP accelerating in 2017. The growth rate in the second half of 2017 was above 4%, taking the full-year growth to 3.7%. Consumer confidence indicators signal healthy end-market demand while purchasing managers’ indices point towards brisk manufacturing activity going forward. Global trade flows have seen a healthy improvement in the last few months driven by a pickup in investment, especially in advanced economies, strong manufacturing growth in Asia, and a recovery in commodity exporting economies.

The advanced economies grew 2.4% in 2017 (+70 bps) on the back of acceleration in investment expenditure. The recovery in the capex cycle reflected higher capacity utilization, favourable financing conditions and strengthening of balance sheets, translating into stronger business sentiments. The revival of investments led to job gains supporting growth in consumer spending. A turnaround in global commodities trade and a pick-up in private consumption led to higher GDP growth in the emerging market and developing economies (EMDEs) in 2017 (4.7%, +30 bps). While China benefitted from a recovery in exports, India’s growth was consumption-driven. Commodity exporters going through a recession such as Brazil and Russia as well as South Africa (witnessing a severe slowdown) benefitted from the bottoming out of the commodity cycle and the consequent revival of export earnings and resurgence in investments. Crude price, after witnessing a sharp decline of 15.7% in 2016, increased 23.3% in 2017. Non-fuel commodity prices expanded 6.8% after falling 1.5% in 2016. The upturn in commodity prices helped global trade volumes accelerate to 5.1% in 2017 after growing by 2.2% during the previous year.

Change in Commodity Prices

Commodity prices are expected to accelerate further through 2018 as international trade flows remain healthy. However, it will also stoke inflation and put currencies under pressure in economies with a higher dependence on commodity imports. Oil is expected to be expensive by 33% while non-fuel commodity prices are projected to increase by 6% in 2018. 2019 will see crude price falling marginally (-1.8%) with non-fuel commodity prices expected to remain broadly flat (0.5%). The advanced economies are expected to remain steady on their growth path with their combined GDP increasing by 2.4% and 2.2% in 2018 and 2019, respectively. The US is expected to be the principal driver of growth within the group, expanding 2.9% and 2.7% over this period compared to the Euro Area’s 2.2% and 1.9%. US GDP growth is seen to accelerate from 2017 levels of 2.3% in spite of the normalization of monetary policy, driven by an expanding job market, an increase in inflation rates from sub-

target levels, and output and profitability gains. Growth in the Euro Area will decline from 2.4% in 2017 amidst anticipated monetary tightening by the European Central Bank (ECB). Post-Brexit, the UK's growth is expected to moderate to 1.4% and 1.5% in 2018 and 2019, respectively (from 1.7% in 2017). Japanese growth too is expected to decelerate to 1.0% in 2018 and 0.9% in 2019 after expanding 1.7% in 2017. International trade volumes are projected to grow 4.8% in 2018 and 4.5% in 2019 (5.1% in 2017).

Growth at the EMDEs is forecast to increase to 4.9% and 5.1% in 2018 and 2019, respectively (from 4.7% in 2017). India is seen to lead the EMDE pack with a growth rate of 7.3% and 7.5% over 2018-2019 (2017: 6.7%), followed by China at 6.6% and 6.4% (2017: 6.9%). Brazil is expected to accelerate from 1% in 2017 to 1.8% in 2018 and 2.5% in 2019.

INDIAN ECONOMIC OVERVIEW

A revival of rural demand aided by a normal monsoon and the implementation of the 7th Pay Commission recommendations helped drive an expansion in public and private consumption during 1H FY18. However, overall demand lagged with investments remaining weak. Output growth witnessed a slowdown except for the agriculture sector with the most affected sectors being construction, real estate and manufacturing. Following 5 consecutive quarters of deceleration from 1Q FY17 to 1Q FY18, India's GDP growth bottomed out to start rebounding in 2Q FY18, posting a rate of 6.3%. In the third quarter, real GDP expanded by 7%, surpassing China's 6.8% growth and restoring India to the coveted position of the fastest growing big economy. Subsequently, growth rate improved further to 7.7% in 4Q FY18 as the economy expanded by 6.7% during the fiscal year (FY17: 7.1%). The strong resurgence in the fourth quarter was driven by the construction (11.5%), manufacturing (9.1%), and agriculture (4.5%) sectors. Manufacturing activities continue to expand with the Nikkei India Manufacturing Purchasing Managers' Index (PMI) staying above 50 for 12 consecutive months to July 2018. The trend suggests that the sector has successfully come out of the temporary slowdown caused by demonetization and GST implementation. Gross fixed capital formation expanded 14.4% in 4Q FY18, signalling a revival of investment activities while government spending grew 13.3%. The IMF forecasts India to grow by 7.3% and 7.5% in FY19 and FY20, respectively, the fastest rates amongst the big economies.

Global GDP Growth Rate Forecast for 2018

Source: World Economic Outlook Update, July 2018, IMF

Retail inflation, as measured by the Consumer Price Index (CPI), increased in April to June after declining through the last quarter of FY18. July CPI inflation stood at 4.17%, lower than the 4.92% recorded in June. After recording a multi-year low of 1.54% in June 2017, retail inflation rates witnessed a secular uptrend from June to December. The Reserve Bank of India (RBI) twice hiked the key policy rate by 25 bps each in June and August this year after a gap of four and a half years, driven by higher headline inflation during 1Q FY19 and expectations of an accelerating inflation rate in the second half of the fiscal year. The benchmark repo rate currently stands at 6.50%.

Exports expanded 9.8% during FY18, the highest growth rate in 6 years, after growing 4.5% in FY17. Previously, FY16 had seen a decline in exports by 5.3%. The robust growth in FY18 was driven by a reversal in commodity prices and improved global trade flows. India's trade prospects are expected to thrive with improvements in logistics, integration of investments in the global supply chain, infrastructure development, and an improved business environment.

INDUSTRY OVERVIEW

The textiles sector is one of the oldest industrial sectors of the Indian economy and also a labour intensive one. By directly employing 51 million people and indirectly engaging 68 million, the textiles industry generates the maximum number of jobs in the country after agriculture. The textiles industry contributes 14% of India's manufacturing output and 5% of GDP. The textile industry can be broadly broken down into the unorganised sector comprising segments such as handloom and sericulture which are primarily operated on a small scale, and the organised sector consisting of fibre production, spinning, and fabric and apparel manufacturing segments which employ modern machinery and manufacturing processes. India's overall textile exports (including jute, coir and handicraft) stood at Rs 2.5 lakh crore (US\$ 37.8 bn) in FY17, representing almost 14% of the country's total export earnings. The textile industry is expected to reach US\$ 223 bn by the year 2021. (Source: IBEF)

India's textile industry is predominantly cotton-based as the country is one of the largest producers as well as exporters of cotton yarn. However, besides cotton, India has a strong production base across a wide range of fibres and yarns spanning natural fibres such as jute, silk and wool to synthetic/man-made fibres such as polyester, viscose, nylon and acrylic. Apart from China, no other country has such a strong and diverse base in textile fibres and yarns as India. While the hand-spun and handloom segments represent one end of the spectrum, the capital intensive and mechanized mills sector lies at the other end of the textile industry. The decentralised power looms, hosiery and knitting segments are amongst the largest constituents of the Indian textiles sector.

In December 2017, India's cotton industry, comprising cotton yarn, cotton fabrics, cotton made-ups and handloom products, was valued at US\$ 939 mn. The manmade fibre (MMF) segment, comprising manmade yarn, fabric and made-ups, was valued at US\$ 417 mn. By overtaking Italy and Bangladesh, India has now become the world's second largest textile and clothing exporter in the world (after China), contributing approximately 5% of the global textile and clothing trade. (Source: IBEF)

Global Textile Industry

The global textile business is estimated to have been worth US \$830 bn in 2015 and is forecast to reach US\$ 1,237 bn by 2025 driven by population growth, rising urbanization, growth in disposable income and improving lifestyle in the emerging economies such as China, India and Mexico (source: Grand View Research). The World Trade Organization (WTO) expects global trade in textiles and apparels (T&A) to expand by 3.3% in 2018 and by 4% in 2019. Innovation and investment in it will be a key driver of the T&A sector going forward. Further, technical textiles, with an increasing share of the overall textile pie, will be a key segment driving overall growth of the textile industry.

The textile industry is moving towards automation from labour intensive production. Automation has enabled textile manufacturing companies to increase productivity and reduce costs. The fact that 1.2 million industrial robots are expected to be deployed by 2025 is a testimony to the increased adoption of automation in manufacturing and other businesses. Textile machinery hubs such as China, Germany, Italy, Switzerland and

India have been taking big strides towards bringing about further technological advancements in textile machinery. Global Industry Analysts (GIA) estimates the global textile machinery market is to touch US\$ 25 billion by 2018 driven by demand for advanced machines producing high-quality textiles. Other factors seen to drive the textile machinery market include global economic recovery and revival of the capex cycle, rising demand for nonwoven disposable textiles, increasing demand from emerging economies, especially Asia Pacific, and growing demand for sustainable textile products. Asia has the largest installed capacity of textile machinery with 86% of short-staple spindles, 45% of long staple spindles, 55% of rotor spinning machines, 73% of shuttle fewer looms and 85% of shuttle looms. China, India, Pakistan, Indonesia and Thailand are amongst the leading Asian markets in terms of installed capacity.

Domestic Textile Industry

India is the world's second largest textile manufacturer and exporter after China. The share of the T&A sector in India's total exports was 12.4% in FY18 while the country commands a market share of 5% in T&A international trade. The EU and the US are major destinations for Indian T&A exports with these two geographies accounting for 47% of T&A exports from India. Being a labour intensive sector, the T&A sector directly employs 4.5 crore people while another 6 crore are employed in allied sectors. The T&A and related sectors also employ a large number of rural people as well as women.

The fundamental strength of India's textile industry lies in its strong manufacturing capacity across a wide range of fibres and yarns including natural fibres such as cotton, jute, silk and wool as well as MMF such as polyester, nylon, acrylic and viscose. India produces 14% of the global output of textile fibres and yarns. The country is the leading producer of jute, second largest producer of silk and cotton, and third largest producer of cellulose fibres in the world. The Indian MMF textiles industry manufactures products of international standard and quality across categories. It is the world's second largest producer of manmade fibre and filament, having produced 211 million kg in FY17. One of the leading exporters of MMF textiles to the EU and the US, India is the second largest producer of polyester and viscose globally. The country is also the sixth largest exporter of MMF in the world, generating about US\$ 6 bn in annual export earnings. The Indian textiles sector has strong fundamentals and a rich base of raw materials across both the cotton and MMF segments. India has a robust textile value chain with presence across raw materials, fibre, yarn, fabric and fashion segments. While the upstream segments play an important role by supplying the much-needed inputs down the value chain, the downstream segments' value addition contributes to the sector's overall output and exports. The forward and backward integration imparts fundamental strength to the sector and puts it in an advantageous position to exploit the growth in demand for textiles across different end markets.

SAHAJ is an ISO 9001:2015 recognized company for its Quality management System and also an ISO 14001:2015 recognised company for its Environmental Management System. We are engaged in manufacturing of international standard fabric which is used for various purposes such as Garments, Home Furnishings, and Industrial Applications, etc. We have expertise in manufacturing of primarily cotton suiting fabric and cotton shirting fabric apart from polyester based and cotton-polyester blended fabrics. We also manufacture cotton yarn dyed fabrics which are almost always in demand by the garment manufacturing industry. At present our sales have penetrated our home state of Rajasthan as well as some other states like Gujarat, Maharashtra & Delhi.

Our company was established in the year 2011 with an aim to manufacture of international standard textile fabric. Hence, our company purchased land in Kishangarh, Rajasthan to setup a manufacturing unit which we completed and the unit started commercial production on April 04, 2012 in a record time of 6 months from the date of laying the foundation stone.

In the year 2014, we exposed our product to international markets through Merchant Exporters in which we do not have to face the risk of forex fluctuation. In 2015, our company decided to enter into expansion with backward integration which is a pre-process of fabric weaving. As a result, our company installed and commissioned further machinery of Textile Preparatory (Sizing Machine Plant) in our manufacturing facility in Rajasthan thereby improving the quality and timely delivery of the orders.

In the year 2016, our company decided to set up an office at Ichalkaranji, Maharashtra near the border of Maharashtra and Karnataka with a vision to tap the nearby market regions of fine count shirting fabric primarily and as a result in a niche time SAHAJ became a known name in the market for the manufacturers based there. Due to the appropriate geographical location it is well connected to various important cities of India by the means of road, rail and air transportation.

In the past five financial years as per restated financials our revenues have continuously increased from Rs. 3,264.01 lakhs in FY 2013-14 to Rs. 3,814.93 lakhs in FY 2014-15 to Rs. 6,278.38 lakhs in FY 2015-16 to Rs. 8,349.74 lakhs in FY 2016-17 and further to Rs. 11,197.82 lakhs in FY 2017-18, showing an increase of 16.88%, 64.57%, 32.99% and 34.11%. Further, the Market Maker(s) shall inform the Exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).

After a period of three months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 25 % of Issue Size (Including the 1,38,000 Equity Shares out to be allotted under this Issue.) Any Equity Shares allotted to Market Maker under this Issue over and above 1,38,000 Equity Shares would not be taken in to consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of Market Maker in our Company reduce to 24% of Issue Size, the market maker will resume providing 2-way quotes.

7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker(s) shall have the right to terminate said arrangement by giving one month notice or on mutually acceptable terms to the Lead Manager, who shall then be responsible to appoint a replacement Market Maker(s).

In case of termination of the above mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker(s) in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 106V of the SEBI (ICDR) Regulations, 2009. GLOBAL ECONOMIC OVERVIEW

The global economy is witnessing a broad-based revival with the cyclical upswing that started in mid-2016 gaining strength, aided by policy stimulus and characterized by a pickup in investments, growth in international trade and employment gains. This is the strongest synchronized global growth upturn since 2010 with GDP growth in two-thirds of countries collectively contributing 75% of the global GDP accelerating in 2017. The growth rate in the second half of 2017 was above 4%, taking the full-year growth to 3.7%. Consumer confidence indicators signal healthy end-market demand while purchasing managers’ indices point towards brisk manufacturing activity going forward. Global trade flows have seen a healthy improvement in the last few months driven by a pickup in investment, especially in advanced economies, strong manufacturing growth in Asia, and a recovery in commodity exporting economies.

The advanced economies grew 2.4% in 2017 (+70 bps) on the back of acceleration in investment expenditure. The recovery in the capex cycle reflected higher capacity utilization, favourable financing conditions and strengthening of balance sheets, translating into stronger business sentiments. The revival of investments led to job gains supporting growth in consumer spending. A turnaround in global commodities trade and a pick-up in private consumption led to higher GDP growth in the emerging market and developing economies (EMDEs) in 2017 (4.7%, +30 bps). While China benefitted from a recovery in exports, India’s growth was consumption-driven. Commodity exporters going through a recession such as Brazil and Russia as well as South Africa (witnessing a severe slowdown) benefitted from the bottoming out of the commodity cycle and the consequent revival of export earnings and resurgence in investments. Crude price, after witnessing a sharp decline of 15.7% in 2016, increased 23.3% in 2017. Non-fuel commodity prices expanded 6.8% after falling 1.5% in 2016. The upturn in commodity prices helped global trade volumes accelerate to 5.1% in 2017 after growing by 2.2% during the previous year.

Change in Commodity Prices

Global Trade Volume Growth

Source: World Economic Outlook Update, July 2018, IMF

Commodity prices are expected to accelerate further through 2018 as international trade flows remain healthy. However, it will also stoke inflation and put currencies under pressure in economies with a higher dependence on commodity imports. Oil is expected to be expensive by 33% while non-fuel commodity prices are projected to increase by 6% in 2018. 2019 will see crude price falling marginally (-1.8%) with non-fuel commodity prices expected to remain broadly flat (0.5%). The advanced economies are expected to remain steady on their growth path with their combined GDP increasing by 2.4% and 2.2% in 2018 and 2019, respectively. The US is expected to be the principal driver of growth within the group, expanding 2.9% and 2.7% over this period compared to the Euro Area's 2.2% and 1.9%. US GDP growth is seen to accelerate from 2017 levels of 2.3% in spite of the normalization of monetary policy, driven by an expanding job market, an increase in inflation rates from sub-

target levels, and output and profitability gains. Growth in the Euro Area will decline from 2.4% in 2017 amidst anticipated monetary tightening by the European Central Bank (ECB). Post-Brexit, the UK's growth is expected to moderate to 1.4% and 1.5% in 2018 and 2019, respectively (from 1.7% in 2017). Japanese growth too is expected to decelerate to 1.0% in 2018 and 0.9% in 2019 after expanding 1.7% in 2017. International trade volumes are projected to grow 4.8% in 2018 and 4.5% in 2019 (5.1% in 2017).

Growth at the EMDEs is forecast to increase to 4.9% and 5.1% in 2018 and 2019, respectively (from 4.7% in 2017). India is seen to lead the EMDE pack with a growth rate of 7.3% and 7.5% over 2018-2019 (2017: 6.7%), followed by China at 6.6% and 6.4% (2017: 6.9%). Brazil is expected to accelerate from 1% in 2017 to 1.8% in 2018 and 2.5% in 2019.

The US Federal Reserve has already embarked on its journey of gradually reducing the size of its balance sheet and raising rates. The Fed has raised interest rates twice so far in 2018, first in March and subsequently in June, and has forecast two further rates hikes this year. The benchmark overnight lending rate was hiked by 25 bps on each occasion and currently stands in a range of 1.75% to 2%. While the tone of the central bank has tended to be more hawkish since June, it also means that the economy is growing strongly. The monetary policy committee changed their view on economic growth from "solid" to "strong" between June and August. The Fed expects inflation to hover around 2.1% in 2018 through 2020, marginally over its target of 2%. The policy rate is seen to increase to 3.1% by 2019-end and subsequently touch 3.4% by 2020. The central bank expects a GDP growth of 2.8% this year, an upward revision from its March estimate of 2.7%. Thereafter, it expects the economy to expand by 2.4% in 2019 and 2% in 2020. Since the financial crisis of the last decade, the US economy grew at an average annual rate of 2.2% between 2009 and 2017. The US\$ 1.5 tn in tax cuts and planned increase in federal spending by US\$ 320 bn over the next decade are expected to provide further thrust to the economy, leading to accelerated expansion.

The European Central Bank (ECB) is expected to reduce its monthly asset purchases during 2018. A faster-than-expected bounce-back in inflation rates could result in an early end to the ECB's asset purchase programme. Monetary policy is expected to moderately tighten in the G7 as output gaps close out and inflation expectations stabilize. Policy stance of the Bank of Japan (BoJ) is expected to remain largely unchanged though.

INDIAN ECONOMIC OVERVIEW

A revival of rural demand aided by a normal monsoon and the implementation of the 7th Pay Commission recommendations helped drive an expansion in public and private consumption during 1H FY18. However, overall demand lagged with investments remaining weak. Output growth witnessed a slowdown except for the agriculture sector with the most affected sectors being construction, real estate and manufacturing. Following 5 consecutive quarters of deceleration from 1Q FY17 to 1Q FY18, India's GDP growth bottomed out to start rebounding in 2Q FY18, posting a rate of 6.3%. In the third quarter, real GDP expanded by 7%, surpassing China's 6.8% growth and restoring India to the coveted position of the fastest growing big economy. Subsequently, growth rate improved further to 7.7% in 4Q FY18 as the economy expanded by 6.7% during the fiscal year (FY17: 7.1%). The strong resurgence in the fourth quarter was driven by the construction (11.5%), manufacturing (9.1%), and agriculture (4.5%) sectors. Manufacturing activities continue to expand with the Nikkei India Manufacturing Purchasing Managers' Index (PMI) staying above 50 for 12 consecutive months to July 2018. The trend suggests that the sector has successfully come out of the temporary slowdown caused by demonetization and GST implementation. Gross fixed capital formation expanded 14.4% in 4Q FY18, signalling a revival of investment activities while government spending grew 13.3%. The IMF forecasts India to grow by 7.3% and 7.5% in FY19 and FY20, respectively, the fastest rates amongst the big economies.

Global GDP Growth Rate Forecast for 2018

Source: World Economic Outlook Update, July 2018, IMF

Retail inflation, as measured by the Consumer Price Index (CPI), increased in April to June after declining through the last quarter of FY18. July CPI inflation stood at 4.17%, lower than the 4.92% recorded in June. After recording a multi-year low of 1.54% in June 2017, retail inflation rates witnessed a secular uptrend from June to December. The Reserve Bank of India (RBI) twice hiked the key policy rate by 25 bps each in June and August this year after a gap of four and a half years, driven by higher headline inflation during 1Q FY19 and expectations of an accelerating inflation rate in the second half of the fiscal year. The benchmark repo rate currently stands at 6.50%.

Exports expanded 9.8% during FY18, the highest growth rate in 6 years, after growing 4.5% in FY17. Previously, FY16 had seen a decline in exports by 5.3%. The robust growth in FY18 was driven by a reversal in commodity prices and improved global trade flows. India's trade prospects are expected to thrive with improvements in logistics, integration of investments in the global supply chain, infrastructure development, and an improved business environment.

With an eye to boost exports, the Indian government released the Foreign Trade Policy (FTP) 2015-20 in April 2015. The policy framework, besides aiming to increase exports of goods and services, seeks to generate of employment and increase value addition in the exports sector in line with the 'Make in India' programme. It introduced two new schemes: (a) Merchandise Exports from India Scheme (MEIS), an export promotion scheme promoting the export of notified goods produced in India; (b) Services Exports from India Scheme (SEIS), an incentive scheme for export of eligible services. The FTP envisages the creation of a stable and sustainable policy environment for foreign trade while promoting the diversification of exports. Further, the policy seeks to increasing the demand for Indian products and contributing to the Make in India initiative with the objective of rationalizing imports and reducing the trade imbalance.

This year's Budget announcements for the export sector included an increase in allocation from Rs 1,100 crore to Rs 2,000 crore for the Interest Equalisation Scheme (IES) for FY18 and Rs 2,500 crore for FY19. Further, the allocation for Remission of State Levies (ROSL) has been enhanced from Rs 1,555 crore to Rs 1,855 crore for 2018 FY and Rs 2,164 crore for FY 2019. ROSL compensates exporters for state levies while under IES, exporter get loans at lower interest rates. The increased allocations for the programmes will be helpful for both merchandise and service exporters, particularly labour-intensive sectors.

India Export

India FDI Inflow

Source: www.tradingeconomics.com

FDI inflows in FY18 increased to US\$ 62 bn from US\$ 60 bn in FY17, aided by ease in FDI policies and continued global liquidity. India's forex reserves rose to an all-time high of US\$ 426 bn on 13 April 2018, equivalent to 11 months of imports. That was, however, still lower than pre-global financial crisis level of 14 months. India's forex reserve has seen a healthy rise over the past year. It touched US\$ 400 bn for the first time on 8 September 2017. The rupee appreciated approximately 6% in 2017 in sync with many other emerging economies, partly due to US dollar weakening. The strong FDI as well as FPI inflows helped the Indian currency gain against the greenback. Net FPI inflows stood at Rs 1.45 tn during FY18. The rupee, however, has been witnessing downward pressure this year, having depreciated approximately 10% on account of rising oil prices and an expanding current account deficit.

Fiscal deficit stood at 3.5% of GDP in FY18 as the government targets a deficit of 3.3% in FY19. Global ratings agency Moody's has expressed its confidence about the Indian government's ability to meet the fiscal deficit target. Overall, government expenditure has generally shifted towards productive infrastructure spending in recent years which has acted as a growth catalyst.

Direct tax collections increased 18% during FY18 to Rs 10.02 lakh crore, broadly in line with the government's revised estimate and higher than its initial estimate of Rs. 9.80 lakh crore. GST collection has clocked a monthly run rate of Rs 89,000 on average since its inception in July 2017 through April 2018. The union government estimates GST collection of Rs 7.46 lakh crore excluding SGST collection by state governments in FY19. Going forward, GST collections are expected to increase due to improved compliance.

The upgrade of India's sovereign rating from Baa3 (lowest investment grade) to Baa2 by international ratings agency Moody's is positive from both a market sentiments point of view as well as in terms of cost of overseas borrowing by the government and businesses. Importantly, this is India's first ratings upgrade in 14 years indicating approval of the country's reform measures by the international community as well as an overall improvement of economic prospects.

India's advancement in the ease of doing business ranking from 130 to 100 in the World Bank's Doing Business 2018 report showcases the effectiveness of reforms undertaken to provide an enabling environment for starting and conducting business in the country. The area where India has improved the most is its ability to handle insolvency cases, climbing 33 places to secure a rank of 103. The new bankruptcy law is expected to discourage wilful defaulters and have a positive impact on banks' asset quality and overall economic growth. The multilateral agency also recognized India's reforms push by highlighting that the country has implemented reforms in 8 out of the 10 Doing Business areas. The government's intent to go ahead with bold reforms and an overall growth-centric stance (in terms of both policy-making and implementation) suggest a strong growth bias in policy going forward.

The recapitalization of public sector banks will not only help the government-owned banks raise regulatory capital and provide for bad loans but it will also supply them growth capital which will eventually drive the real economy through increased lending. While recapitalization through the issuance of bonds by the government will increase the sovereign debt, the fiscal implication of incremental interest expenses for the government will be partially offset by higher dividend income. Overall, as the recapitalization boosts economic activity, incremental tax revenue will be a positive outcome. Further, the RBI's revised framework for faster time-bound resolution of non-performing loans should help the banking system manage NPAs more effectively. Growth acceleration coupled with increased revenue generation by the government should also support India's sovereign rating outlook.

India has achieved significant gains in poverty reduction with poverty levels declining since FY05. However, demonetization and depressed food prices could have moderated the pace of decline in poverty in the short term. With demonetization affecting the informal sector most, demand for social security schemes such as MGNREGA increased.

INDUSTRY OVERVIEW

The textiles sector is one of the oldest industrial sectors of the Indian economy and also a labour intensive one. By directly employing 51 million people and indirectly engaging 68 million, the textiles industry generates the maximum number of jobs in the country after agriculture. The textiles industry contributes 14% of India's manufacturing output and 5% of GDP. The textile industry can be broadly broken down into the unorganised sector comprising segments such as handloom and sericulture which are primarily operated on a small scale, and the organised sector consisting of fibre production, spinning, and fabric and apparel manufacturing segments which employ modern machinery and manufacturing processes. India's overall textile exports (including jute, coir and handicraft) stood at Rs 2.5 lakh crore (US\$ 37.8 bn) in FY17, representing almost 14% of the country's total export earnings. The textile industry is expected to reach US\$ 223 bn by the year 2021. (Source: IBEF)

India's textile industry is predominantly cotton-based as the country is one of the largest producers as well as exporters of cotton yarn. However, besides cotton, India has a strong production base across a wide range of fibres and yarns spanning natural fibres such as jute, silk and wool to synthetic/man-made fibres such as polyester, viscose, nylon and acrylic. Apart from China, no other country has such a strong and diverse base in textile fibres and yarns as India. While the hand-spun and handloom segments represent one end of the spectrum, the capital intensive and mechanized mills sector lies at the other end of the textile industry. The decentralised power looms, hosiery and knitting segments are amongst the largest constituents of the Indian textiles sector.

In December 2017, India's cotton industry, comprising cotton yarn, cotton fabrics, cotton made-ups and handloom products, was valued at US\$ 939 mn. The manmade fibre (MMF) segment, comprising manmade yarn, fabric and made-ups, was valued at US\$ 417 mn. By overtaking Italy and Bangladesh, India has now become the world's second largest textile and clothing exporter in the world (after China), contributing approximately 5% of the global textile and clothing trade. Global Textile Industry

The global textile business is estimated to have been worth US \$830 bn in 2015 and is forecast to reach US\$ 1,237 bn by 2025 driven by population growth, rising urbanization, growth in disposable income and improving lifestyle in the emerging economies such as China, India and Mexico (*source: Grand View Research*). The World Trade Organization (WTO) expects global trade in textiles and apparels (T&A) to expand by 3.3% in 2018 and by 4% in 2019. Innovation and investment in it will be a key driver of the T&A sector going forward. Further, technical textiles, with an increasing share of the overall textile pie, will be a key segment driving overall growth of the textile industry.

The textile industry is moving towards automation from labour intensive production. Automation has enabled textile manufacturing companies to increase productivity and reduce costs. The fact that 1.2 million industrial robots are expected to be deployed by 2025 is a testimony to the increased adoption of automation in manufacturing and other businesses. Textile machinery hubs such as China, Germany, Italy, Switzerland and India have been taking big strides towards bringing about further technological advancements in textile machinery. Global Industry Analysts (GIA) estimates the global textile machinery market is to touch US\$ 25 billion by 2018 driven by demand for advanced machines producing high-quality textiles. Other factors seen to drive the textile machinery market include global economic recovery and revival of the capex cycle, rising demand for nonwoven disposable textiles, increasing demand from emerging economies, especially Asia Pacific, and growing demand for sustainable textile products. Asia has the largest installed capacity of textile machinery with 86% of short-staple spindles, 45% of long staple spindles, 55% of rotor spinning machines, 73% of shuttle fewer looms and 85% of shuttle looms. China, India, Pakistan, Indonesia and Thailand are amongst the leading Asian markets in terms of installed capacity.

China dominates the T&A export market with market shares of 40% in made-ups, 37% in apparels and 39% in fabric. According to the World Trade Statistical Review 2017, published by the WTO, the value of global textiles export was US\$ 284 bn while apparel exports totalled US\$ 443 bn in 2016. India, Italy, Germany, Bangladesh, Hong Kong, Vietnam and Turkey are the other major exporters of textiles and apparels. China's share of the T&A export market of 39% is followed by India at a distant second place with a 5% share. While the EU, the US, China and Vietnam are some of the top textile importers, top importers of clothing include the EU, the US, Japan and Hong Kong. Apparel imports by emerging economies such as Russia, China and India have shown some momentum lately.

Globally, the textile yarn market is fragmented, capital intensive marked by stiff competition between a large number of players operating at regional and local levels. On the demand side, long term prospects are robust on account of an expanding middle class in the emerging markets. Profitability is subject to volatile raw material prices, rising wages, intense competition and changes in consumer preferences.

Asia Pacific is the largest textile manufacturing region with 68% market share followed by North America in a distant second position with a 9% market share. Asia Pacific's dominance in textile manufacturing can be attributed to the presence of many fabric, apparel and home furnishing manufacturing facilities in the region.

Domestic Textile Industry

India is the world's second largest textile manufacturer and exporter after China. The share of the T&A sector in India's total exports was 12.4% in FY18 while the country commands a market share of 5% in T&A international trade. The EU and the US are major destinations for Indian T&A exports with these two geographies accounting for 47% of T&A exports from India. Being a labour intensive sector, the T&A sector directly employs 4.5 crore people while another 6 crore are employed in allied sectors. The T&A and related sectors also employ a large number of rural people as well as women.

The fundamental strength of India's textile industry lies in its strong manufacturing capacity across a wide range of fibres and yarns including natural fibres such as cotton, jute, silk and wool as well as MMF such as polyester, nylon, acrylic and viscose. India produces 14% of the global output of textile fibres and yarns. The country is the leading producer of jute, second largest producer of silk and cotton, and third largest producer of cellulose fibres in the world. The Indian MMF textiles industry manufactures products of international standard and quality across categories. It is the world's second largest producer of manmade fibre and filament, having produced 211 million kg in FY17. One of the leading exporters of MMF textiles to the EU and the US, India is the second largest producer of polyester and viscose globally. The country is also the sixth largest exporter of MMF in the world, generating about US\$ 6 bn in annual export earnings. The Indian textiles sector has strong fundamentals and a rich base of raw materials across both the cotton and MMF segments. India has a robust textile value chain with presence across raw materials, fibre, yarn, fabric and fashion segments. While the upstream segments play an important role by supplying the much-needed inputs down the value chain, the downstream segments' value addition contributes to the sector's overall output and exports. The forward and backward integration imparts fundamental strength to the sector and puts it in an advantageous position to exploit the growth in demand for textiles across different end markets.

Fabric production in India stood at 64,421 million sq m with per capita cloth availability of 41.55 sq m in FY17. Production volumes of cotton, 100% non-cotton and blended fabrics were 38,837 million sq m, 13,563 million sq m and 11,080 million sq m, respectively. India exported cotton fabric worth Rs 10,994 crore while the value of manmade fabric exports was Rs 11,817 crore in FY17. In terms of overall textiles export (excluding readymade garments), cotton stood at Rs 68,475 crore compared to Rs 34,590 crore worth of manmade textiles during FY17.

Policy Support

The government has taken various steps over the years to develop the textile industry and create an enabling environment for it to grow further. The Technology Mission on Cotton (TMC), Technology Upgradation Fund Scheme (TUFS) and rationalization of fiscal duties are amongst the policy initiatives taken to help support the textile industry. The rationalization of fiscal duties has provided a level playing field to all segments resulting in the holistic growth of the industry. While TMC led to an increase in cotton output and helped reduce contamination levels, TUFS has allowed the commissioning of state-of-the-art textile machinery at competitive capital costs.

Technology Upgradation Fund Scheme: Launched in 1999, TUFS is the Textile Ministry's flagship scheme for facilitating upgrade of technology in the textile industry by providing access to capital at internationally comparable interest rates. The scheme has enabled the installation of state-of-the-art machinery by the textile industry. A modified form of the scheme was implemented during FY08 to FY11 following which it was relaunched in FY12. The outlay for TUFS for the period 2012-17 was Rs 15,886 crore.

Scheme for Integrated Textile Parks: The Indian textile sector was largely fragmented with little integration across the segments of the value chain. Further, it suffered from the lack of availability of quality infrastructure. The Scheme for Integrated Textile Parks (SITP), launched in 2005, aimed to set up textile manufacturing units in a cluster and provide infrastructure facilities of global standards on a public private partnership (PPP) model. 40 projects were sanctioned under SITP with an aggregate cost of Rs 4,183 crore including government assistance of Rs 1,420 crore. Up until June 2010, the programme had received a grant funding of Rs 812 crore while it had a budget of Rs 1,400 crore for the Twelfth Plan period of 2012-17.

Integrated Apparel Development Scheme: The Integrated Apparel Development Scheme (IADS) involves setting up of integrated apparel clusters with the objective of generating employment opportunities in selected villages and cities identified by the state governments. The programme looks to promote self-employment, entrepreneurship development, industrialization and ancillarisation in the textile and apparel value chain. The incentives provided under the programme include fiscal benefits, power subsidy, transport subsidy, industrial infrastructure development, incentives for employing equipment for environmental protection, employees' accommodation and other benefits. The budget allocation for the scheme was Rs 1,000 crore for the period 2012-17.

Integrated Skill Development Scheme: The Integrated Skill Development Scheme (ISDS) looks to support the manpower needs of the textile sector and its value chain segments such as apparel, handicraft, handloom, jute, sericulture and technical textiles through skill development programs. The scheme engages state government agencies, training institutes and the private sector as implementing agencies. The programme aims to enhance the capacity and employability of the targeted trainees as it covers all facets of skill development such as basic training, upgrading of skills, advanced training in emerging technologies, training of trainers, orientation towards modern technology, and managerial skills. A total of 11.3 lakh training targets have been sanctioned under 76 projects involving 58 implementing agencies spread across India. Approximately 3,250 training centres are present in both urban and rural areas across almost all states including remote and backwards regions. 357 out of 664 districts across the country have been already covered by the programme.

Some other policy initiatives towards strengthening and driving the textile sector are:

- Announcement of a special package of Rs 6,000 crore for the T&A sector in 2016 which was subsequently extended to the made-ups sector.
- Increase of the reward rate under the Merchandise Exports from India Scheme (MEIS) for readymade garments and made-ups from 2% to 4%. Rewards under MEIS are given in the form of duty credit scrip which can be transferred or used for paying duties/taxes including customs duty.
- The organization of India's first mega international trade event for the textile sector in 2017. The event was attended by CEOs and other delegates from over 100 countries and saw the signing of 65 MOUs.

- The extension of Gujarat government's textile policy by a year until September 2018 is expected to attract an incremental investment of Rs 5,000 crore across the textile value chain. According to government estimates, up until September 2017, 1 million units of spindle capacity were added and over 1,000 technical textile units were set up since the commencement of the programme in 2013.
- The Textile Ministry has earmarked Rs 690 crore for setting up 21 readymade garment manufacturing units in seven states with the objective of developing and modernizing the Indian textile sector.
- The Ministry of Textiles and the Energy Efficiency Services Limited (EESL) has launched a technology upgrade scheme called SAATHI (Sustainable and Accelerated Adoption of Efficient Textile Technologies to Help Small Industries) for reviving India's powerloom sector.

Outlook

The textile and apparel industry is projected to reach US\$ 223 bn by 2021 from US\$ 137 bn in 2016, implying a CAGR of 10%. The key drivers of this growth will be growing domestic demand as well as a buoyant export market, which, in turn, will be helped by the cost advantage of domestic production. The yarn market is estimated to be worth US\$ 12.6 bn by 2020, growing at 4.2% CAGR from 2015 to 2020. Indian textile and apparel exports are expected to more than double from US\$ 40 bn in 2016 to US\$ 82 bn in 2021, translating into a CAGR of 12%. (Source: Ministry of Textiles; IBEF)

Production of cotton and blended fabric in India has witnessed an upward trend in the past few years. Both cotton fabric and blended fabric production increased 3% to 39,894 million sq m and 11,384 million sq m, respectively in FY18. Production of 100% non-cotton fabric expanded strongly by 12% to 15,236 million sq m, last fiscal. (Source: Ministry of Textiles; IBEF)

India's per capita apparel consumption was US\$ 45 versus US\$ 172 of China in 2015. In 2010, the per capita consumption in India was US\$ 30 compared to China's US\$ 119, the US's US\$ 690 and the EU's US\$ 701. By 2025, India's per capita spend on clothing is expected to increase by more than 1.7x to US\$ 123 but the market will remain relatively underpenetrated. As a matter of fact, India's projected per capita consumption in 2025 will still be lower than 2015 levels in most developed countries and BRIC economies. (Source: www.fashionunited.in; Technopak Advisors)

The demonetization of high value notes in November 2016 affected almost all sectors of the economy and especially the consumer markets. The T&A sector too saw a slide in demand on account of lower consumer spending during 2H FY17. This resulted in inventory accumulation at retailers leading to a slowdown in orders at apparel and home textile manufacturers. The tightened money supply also led to holdups in payments which trickled across the entire textile value chain resulting in a temporary slowdown. As the supply of currency notes increased and cashless transactions picked up, end market demand saw some traction. Subsequently there was another round of destocking preceding the launch of GST in July 2017 with business activity accelerating in the following months. The effect of GST will be positive in the medium-to-long term as it eases up the movement of goods and services across the textile value chain as well as across states. Moreover, the GST is beneficial for the organized sector as it creates a more level playing field by improving compliance and increasing market efficiency.

The Indian textiles sector is technologically advanced and enjoys a competitive advantage in the international market due to its quality standards and cost advantage. The textile industry is growing at a brisk pace driven by robust domestic consumption and export demand. The sector has witnessed strong investment flows in the past few years on the back of a strong textile and clothing export market with readymade garments accounting for the largest share of the pie. The Indian textiles market is still cotton-oriented with low penetration of MMF-based textiles unlike in the developed and other global markets. Consumption of MMF-based fabrics is, however, on the rise in India aided by factors such as cotton price fluctuations, growth of value retails, growth of women's wear, and extended presence and sourcing by global brands where polyester fibre is dominantly used. The under-penetration of MMF presents a robust opportunity for the sector in India with consumer preferences changing further in line with the global trend, driving increased consumption of MMF in the medium to long term. While demand for MMF-based fabrics will see a faster growth rate due to its lower base, cotton will continue to be the dominant fabric in the Indian domestic market going forward due to consumer preferences and climatic conditions.

Our competition varies for our products and regions. We compete with other manufacturers on the basis of product range, product quality, and product price including factors, based on reputation, regional needs, and customer convenience. While these factors are key parameters in client's decisions matrix in purchasing goods; product range, product quality and product price is often the deciding factor in most deals. We face competition from various manufacturers such as –

- Arvind Limited
- Nahar Industrial Enterprises Limited
- Sangam India Limited
- S K S Textiles Limited
- Anjani Synthetics Limited
- Kallam Textiles Limited

In order to counter the competition, our focus would be to provide products that would be in consonance with technical and quality requirements of our customer as well as by trying to offer a competitive pricing model without compromise on the quality.

Our competition depends on the products being offered by various companies in the organized and unorganized segment besides several other factors like quality, price and capacity to deliver. We believe that we are able to compete effectively with them due to our product portfolio, strong marketing network, customized and quality processing services. We expect that our commitment to quality, past record of timely execution and transparency will provide us with an edge over our competitors.

National Textile Policy 2000 (“NTP 2000”)

The NTP 2000 aims at facilitating the growth of the textile industry to attain and sustain a pre-eminent global standing in the manufacture and export of clothing. This objective is sought to be achieved by liberalizing controls and regulations so that the different segments of the textile industry are enabled to perform in a greater competitive environment. One of the key focus areas of the NTP 2000 is on the implementation, in a time bound manner, of the Technology Upgradation Fund Scheme (“TUFS”) covering all manufacturing segments of the industry, seeking to build world class state of the art manufacturing capabilities in conformity with environmental standards. Additionally, certain sector specific initiatives envisaged under the NTP 2000 include raw materials, clothing, exports, and knitting. The GoI constituted an expert level committee in December 2013 to review the NTP 2000 and to formulate a new textile policy to address concerns of adequate skilled work force, labour reforms, attracting investments in the textile sector and for providing a future road map for the textile and clothing industry.

The Government of India, in July 2014, submitted a draft of a new national textile policy, the Vision, Strategy and Action Plan for Indian Textile and Apparel Sector (2024) (“Draft NTP”) with the objective of achieving US\$300.0 billion exports and 20% share of the global trade in the textile sector by 2024-25. However, the said Draft NTP is not yet notified.

Following are the schemes currently enforced by the government: -

➤ Scheme for Integrated Textile Parks (SITP)

Government of India has launched “Integrated Textile Parks” scheme. SITP would create new textile parks of international standards at potential growth centers by 2007-08. The SITP is launched by merging the existing two schemes namely, the Scheme for Apparel Parks for Exports (APE) and the Textile Center Infrastructure Development Scheme (TCIDS). One of the main purposes of introducing the SITP is to provide the industry with world-class infrastructure facilities for setting up their textile units. Industry Associations / Group of Entrepreneurs are the main promoters of the Integrated Textiles Park (ITP).

➤ **100% Foreign Direct Investment (FDI) in the Textile Sector**

The Indian Government has allowed foreign equity investment up to 100% through automatic route, in the textile sector. Indian manufacturing companies are allowed 100% FDI to carry out wholesale trading on “a cash and carry basis” and also export trading through the automatic route, without seeking prior Government approval.

➤ **Integrated Wool Development Programme (IWDP)**

The Integrated Wool Development Programme (IWDP) is an umbrella programme which will be implemented over three years i.e. from 2017-18 to 2019-20 in all wool producing states. Following are the Schemes under this programme:

- a) Wool Marketing Scheme (WMS)
- b) Wool Processing Scheme (WPS)
- c) HRD & Promotional Activities (HRD)
- d) Angora Wool Development Scheme (AWDS)
- e) Wool Development Scheme (WDS)

The Ministry of Textiles, Government of India, launched a Technology Upgradation Fund (“TUF”) scheme for the textile and jute industry for a five-year period from April 1, 1999 to March 31, 2004. It was subsequently extended in 2004 and 2007 with modifications. It was further restructured with effect until March 31, 2012 and extended until March 31, 2013. On October 4, 2013, the Ministry of Textiles provided the financial and operational parameters and implementation mechanism for the Revised Restructured-TUF (“RR-TUF”) scheme for the 12th Five Year Plan period i.e. until March 31, 2017. The TUF scheme provided for interest reimbursement of 5% on the interest charged by a lending agency for financing of a project of technology upgradation in conformity with the TUF scheme. Pursuant to the RR-TUF scheme, in cases of standalone spinning units, the interest reimbursement is 2% for new standalone/replacement/modernization of spinning machinery and 5% for spinning units with forward integration and matching capacity in weaving/knitting/processing/garmenting. The RR-TUF scheme also provides for 5% interest reimbursement and 10% capital subsidy for specified processing machinery, garmenting machinery and machinery required in manufacture of technical textiles. The RR-TUF scheme is monitored by an inter-ministerial steering committee constituted under the chairmanship of the minister of textiles. However, these export incentives may be reviewed shortly to make them WTO compatible.

➤ **Merchandise Exporter from India ("MEI") Scheme**

Pursuant to the Foreign Trade Policy (2015-2020), the MEI scheme has replaced five earlier schemes and was introduced to offset infrastructure inefficiencies and associated costs in export of goods, especially those having high export intensity, employment potential and able to enhance our export competitiveness. The basis for calculation of the reward under the MEI scheme is on the FOB value of exports realized in free foreign exchange or on the FOB value of exports mentioned in the shipping bill, whichever is less, unless otherwise specified.

➤ **Interest Equalization Scheme**

Interest Equalization Scheme on pre and post shipment rupee export credit for five years, starting April 1, 2015. This will provide relief to the exporters from India who were facing extensive competition because of higher interest rates than competing countries like Vietnam, China etc.

MANAGEMENTS' DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read in conjunction with our restated financial statements as of and for the years ended March 31, 2018, 2017, 2016, 2015, and 2014 prepared in accordance with the Companies Act, 2013 and Companies Act, 1956 to the extent applicable and Indian GAAP and restated in accordance with the SEBI ICDR Regulations, including the schedules, annexure and notes thereto and the reports thereon, included in "Financial Statements" beginning on page 149.

Indian GAAP differs in certain material respects from U.S. GAAP and IFRS. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those under U.S. GAAP or IFRS. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with the Companies Act, Indian GAAP and the SEBI ICDR Regulations.

This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors such as those set forth in "Risk Factors" and "Forward-Looking Statements" beginning on pages 19 and 18 respectively.

Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/ Prospectus. For details in relation to allocation, the Bidder may refer to the RHP/ Prospectus.
- Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the Lead Managers and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed Category in QIB Category is not available for subscription to other categories.
- In case of under subscription in the Net Issue, spill-over to the extent of such under subscription may be permitted from the Reserved Category to the Net Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/ Applicants may refer to the RHP.

(d) Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs. 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (In Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of equity shares is the price at which the book cuts off, i.e., 22.00 in the above example. The issuer, in consultation with the Lead Managers, may finalise the issue price at or below such cut-off price, i.e., at or below 22.00. All Bids at or above this issue price and cut-off bids are valid Bids and are considered for allocation in the respective categories.

(e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“Alternate Book Building Process”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIBs, NIBs are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/ or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated SCSB Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty percent to Retail Individual Bidders; and remaining to (i) individual investors other than Retail Individual Bidders; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders other than Retail Individual Bidders and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders may refer to RHP/ Prospectus. No Retail Individual Bidder is will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Bidder Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Net Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Issue for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIBs

Bids received from the RIBs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIBs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total

number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot (“**Maximum RIB Allottees**”). The Allotment to the RIBs will then be made in the following manner:

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India (“**Industrial Policy**”) and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for Foreign Direct Investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. DIPP issued Consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017. The FDI Policy incorporates the changes made in the past year, including liberalization of sectors such as construction, defence, broadcasting, single brand retail trading and LLPs. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a Non-resident does not require the prior approval of the FIPB or the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment Policy (“**FDI Policy 2016**”) and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI and such other conditions as provided in the FDI Policy from time to time. Investors are advised to refer to the exact text of the relevant statutory provisions of law before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company.

The Equity Shares have not been and will not be registered under the U.S Securities Act of 1933, as amended (U.S. Securities Act”) or any state securities laws in the United States and may not be offered or sold within the United States or to, or for the account or benefit of, “U.S. Persons (as defined in Regulation S), except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities laws.
